Company: ASEE Group

Location: İstanbul

Category: other-general

Do you want to be part of a global team to create state-of-the products?

At Mobven, we are passionate about creating exceptional digital solutions. Established in 2012, our company has evolved from a startup into an award-winning mobile technology company. We have been named by Deloitte among the EMEA regions fastest growing top tech companies, now 4 years in a row. We have been acquired by Payten in late 2019 and continue our operations as a subsidiary of Asseco, the 6th largest software house in Europe.

If you are self-motivated and constantly bear in mind how to create a better future with innovative products and services, then, we are looking for individuals like you. Join us and share our ambition to be the game changer in the industry by creating cutting edge digital solutions.

Role Description:

This development will occur in an Agile environment, typically in fixed-length sprints, with regular interactions with Product Owners and other team members. The Software Engineer

is expected to produce high-quality software, to function effectively as a member of a team, to interact with management and other members of the development group, and to continually seek to improve themselves and the company.

Position Responsibilities/Duties:

- Design, develop, document, test, and debug new and existing software systems and/or applications for market sale or large-scale proprietary software for internal use
- Participate in full development life cycle including requirements analysis and design
- Create RESTFUL services using WebAPIs
- Implement the token-based Authorization (JWT) to secure communication between

Microservices

Required:

- Bachelor's Degree in Computer engineering or related field
- Candidate must have 2-4 years' of .Net experience with minimum of 1 years of .Net core
- Minimum of 2 years solely focused on backend
- Demonstrated expertise Entity Framework Core 2.2+
- Demonstrated expertise in C# .NET Core 2.2+.
- Demonstrated expertise with Domain Driven Design.
- Demonstrated expertise with Microservices Architecture
- Proficient MS-SQL, Indexes, T-SQL, Stored Procedures, etc.

Experienced in cloud-based environments, i.e., developing and deploying using Microsoft Azure. Experienced and knowledgeable of security authentication, authorization, OAuth, OpenID, and SAML – a plus
