Apply and be part of our exciting journey!

### Key Responsibilities

Design, develop, and maintain scalable and efficient big data infrastructure, including data storage, processing, and retrieval systems.

Develop algorithms, scripts, and pipelines for processing, cleaning, and analyzing large volumes of data from various sources.

Implement distributed computing frameworks and technologies (e.g., Hadoop, Apache Sqoop, Kafka, Apache Spark, Airflow) to process and analyze data in parallel across clusters of machines.

Develop data visualization tools and dashboards to present insights and findings in a clear and actionable manner for stakeholders.

Monitor the health and performance of big data systems, troubleshoot issues, and

perform routine maintenance tasks to ensure system reliability and availability.

Collaborate with data scientists, analysts, and business stakeholders to understand requirements, gather feedback, and deliver solutions that meet business needs.

Stay informed about emerging technologies and trends in big data and contribute to research efforts to explore new techniques and tools for data processing and analysis.

Prepare comprehensive technical documentation for developed systems and provide ongoing technical support and guidance to team members as needed.

## **Requirements**

Bachelor's Degree in Computer Engineering/Science, or equivalent practical experience

Minimum 2+ Years of Big Data Engineering experience required

In-depth knowledge of Hadoop, Apache Sqoop, Kafka, Apache Spark, Airflow and similar frameworks

Good knowledge of Big Data querying tools, such as Hive, and Hbase

Minimum 1 year of experience with Java.

Minimum 1 year of experience with Python.

Knowledge of scripting languages including shell scripting and Python

Experience Cloudera CDH/CDP installation, configuration, monitoring, cluster security, cluster resources management, maintenance and performance tuning

Designing the architecture of a big data platform, monitoring and maintaining the environment using best practices

Good knowledge of relational databases, industry practices, techniques, and standards

Passionate about learning big data, new technologies , open source technologies

Creative and innovative problem-solving skills

Good team player, result-oriented attitude and analytical mind

Multitasking, time, and stress management

Advanced level of English

### **Get to know us**

If you want to know more about us and what we do, then visit our website:

### **Why Oredata?**

Remote working and flexible time off

Opportunity to get company paid Professional Certificates (Google Cloud Platform, Confluent Kafka, etc)

Access to Online Training Platforms (Udemy, Pluralsight, A Cloud Guru, Coursera, etc.)

Opportunity to work on international projects

Private Health Insurance

Birthday Leave Policy

Dynamic work ecosystem where you can take initiative and responsibility

Open communication, flexibility and start-up spirit

Learning & Development opportunities for both personal and professional growth
