Civil & Structural Engineer

Dhahran, Saudi Arabia (On-Site)

Full-Time

Multiple Vacancies

We are seeking an experienced Civil Engineer who specializes in Civil & Structural Engineering to join our Project Management team (PMT). The client's Project Management Teams are responsible and accountable for the delivery of best-in-class capital projects. PMT is directly involved in executing and managing assigned projects safely, on schedule, within budget and to the highest standards of integrity and compliance. This will involve engineering design, procurement and construction of various sizes (\$), types and complexity of small, medium to multi-billion-dollar mega projects.

The Civil Engineer's primary role is to ensure that engineering design, procurement, construction and project completion are done in compliance with the project objective and contractual requirements i.e. project schedules, cost, HSE, company standards and procedures. The role also involves the review and study of grass root and brownfield facilities

Responsibilities:

Execute capital projects according to the scope, schedule and budget.

Perform complex technical and administrative tasks relative to the Design and

coordination of civil & structural packages.

Provide technical input and review of the design, construction, pre-commissioning, commissioning and startup of facilities.

Address technical issues arising in all phases of the project development related to civil & structural packages of the facilities.

Responsible for project development: engineering studies, technical bid reviews, preliminary engineering, detail designs, materials procurement, construction, pre-commissioning, handover, commissioning and startup.

Review/provide input to the design of civil/structural packages that fully comply with Saudi Aramco standards and specifications.

Manage GES design contractor activities during the development of Pre-FEED & FEED, including definition of project work scope and schedule requirements.

Development of detailed estimate leading to funding appropriation and approval.

Stay up to date with international procedures of project phases, Engineering Phases, bidding procedures, Procurement Processes, Construction Requirements and up-to-date Best Practices.

Have a full understanding of contract documents (inclusive of appendices, drawings and specifications), project execution plans, interface management, change management, construction sequencing, standards specifications and project schedule to ensure timely completion of projects.

Review and resolve day-to-day contractors' activities related to assigned project work during construction and ensure HSE compliance.

Participate in developing civil/structural package deliverables and others such as plot plans, Piping Plans, foundation details, load assessments, stress analysis, Data Sheets, structural details, BRAs, geotechnical & soil tests, etc.

Provide design input in identification, sizing, selection, and procurement of civil/structural material.

Provide design input to facilities such as pipe racks, substations, PIBs, control buildings, valve stations, process plants of Oil, Gas, refining, NGL, utilities etc.

Perform change order scope definition, and cost estimation and assist the PM or company representative in the change management process.

Review weekly/monthly reports on the status/progress of contracts, including project costs and schedules.

Attend project meetings e.g. progress, stakeholders, design review, value improvement.

Review, coordinate, and monitor invoices (claimed vs actual) and contractors submittals.

Perform Project Reporting and implementation of company initiatives during project execution.

Review design/study civil & structural modifications to the facilities.

Provide routine civil & structural (design and construction) support to facilities.

Develop and/or review testing procedures for civil & structural packages

Must-Haves:

Bachelor's degree in Civil/Structural Engineering from a recognized and approved program (an advanced degree is preferred)

15+ experience in years of experience in the Oil, Gas, and refining industries with a specialty in Civil & Structural Engineering, such that the incumbent is recognized as an expert in this field

5+ years of field experience including construction, pre-commissioning, commissioning, startup, and operation

Engineering Design & Construction phase experience with a thorough knowledge of engineering practices and economic principles in the applicable International Codes, Standards and Specifications.

PMP Certification preferred

Mobilize to different locations including remote areas needed

Preferred Nationality:

Albania, Andorra, Austria, Belgium, Bosnia and Herzegovina, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Israel, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Malta, Moldova, Monaco, Montenegro, Netherlands, Norway, Poland, Portugal, Romania, Russian Federation, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey, United Kingdom, United States
