Division/company: Fichtner GmbH & Co. KG

Reference number: 000607

We are looking to fill a permanent position at our Istanbul office as soon as possible with a long-term oriented and highly motivated

Consulting Engineer for Gas Turbines (m/f/x)

Your Tasks

In this role you will be executing power plant projects with a particular focus on the gas turbines with diverse job scopes ranging from project development tasks to supervision of project execution. Your scope of work will include:

Consulting in project development and execution of combined-cycle power plant (CCPP) projects with a focus on the gas turbines

Execution of studies as part of development planning up to realization

Preparation of tender documents and specifications, bid evaluation up to project award

Planning and execution of new built power plants, expansion of power plants and refurbishment of projects

Supervision of project execution including process engineering, interface coordination, coordination of multi-disciplinary teams with the client and other project parties

Technical expert for CCPPs and especially gas turbines for the supervision of commissioning and taking over of projects

Your Profile

Bachelor or Master's degree in process engineering, power plant engineering, mechanical engineering or other relevant studies

Minimum of 10 years of experience in CCPP projects and especially gas turbines, with multi-year experience in developing CCPP concepts, preparation of EPC specifications, EPC bid evaluations and design review

Experience in procurement, construction and commissioning of CCPP plants is an asset, but not mandatory

Flexible to travel and support our international teams

Hands- on attitude when required

Team-player who enjoys working with multi-disciplinary teams

Strong communication skills, verbal and in writing

Strong command of English language both speaking and writing, further languages such as Chinese etc. would be advantageous

Corporate Benefits

Permanent local contract

Long-term development opportunities, with our staff's average length of service standing at 10 years

A modern digital infrastructure enabling staff to work remotely

A comprehensive and thorough induction with the possibility to participate in

training and further education programs as well as languages courses in a company whose support you can always rely on and a working environment that promotes job satisfaction
