CVM Platform Solutions Software Developer / **Pega Developer**

Apply Now

Company: Vodafone

Location: Istanbul

Category: other-general

Your dream job does exist.

Discover it at Vodafone!

We are looking for a **CVM Platform Solutions Software Developer** / **Pega Developer**

First things first: Our Brand.

Here are the key behaviours that help us bring our Spirit and Purpose to life:

• Earn customer loyalty: Small things do matter.

• Experiment, learn fast: Just take the chance.

• Create the future: That's possible.

• Get it done, together: It's up to each of us to make it happen.

Here, everyone can feel free to be themselves and express their ideas.

We are proud to have the most flexible #hybrid way of working in Turkey.

Together with your team, you can decide which days to come to the office depending on your work requirements.

Another favorite: Meeting-free afternoons! Every Friday, arrival of the noon means we can start to take it easy: spend time working on our personal development or catching up with our team. We call this #CumaKafası (Friday mood).

And yes we are Agile! The world is constantly changing. And we cannot afford not to!

Our journey began by simplifying our organizational model and transforming into a more agile structure that now we use extensively, especially in our development processes

Why is this role really critical to us?

Pega Decisioning Architect is responsible for defining decision architecture, solutions & designs for Pega Marketing. Solid end to end experience defining solutions, designs, and implementations in Customer Marketing, Contact Strategy, Segmentation, Adaptive Modelling, Campaign Management - Inbound and Outbound. It is Pega Decisioning Architect's responsibility to analyse, design and develop business strategies in Pega platform.

How will you spend your time at Vodafone?

• Iteratively document and improve architectural approaches, service design, and development processes and approaches.

• Refine and/or redesign application architecture to be more cost-effective, including the optimal selection of implementation technologies, practices, and skills for application delivery success.

• Define the current application architecture, and identify issues within it, including tracking technical debt.

• Create and maintain application architecture deliverables and artifacts.

• Develop Pega Strategies to leverage channels and capabilities that exists to actualize customer journeys.

• Develop Pega DataFlows for processing both batch and realtime events.

• Develop Pega ESM rules for realtime stream processing

• Actively participate in the requirements, design, and build phases of an application through collaboration with the business contacts and Pega consultant team

• Assist with the planning and execution of unit, integration and user acceptance testing

• Support existing applications and production issues

You are just the person we've been looking for, if you have:

• Bachelor's degree or Master's degree in a related field (preferably quantitative focus such as Engineering)

• Pega Certified Decisioning Consultant (PCDC) is preferable.

• Pega Certified System Architect (PCSA) is a plus.

• 6+ years of work experience in IT roles

• 3+ years of Pega experience in Pega Decisioning and Pega Marketing skills is mandatory

• Strong knowledge on Pega Adaptive and Predictive models.

• Experince integrating 3rd party big data models to Pega Strategies.

• Experience on CDH (Customer Decision Hub) is a preferable.

• Experience on ADM (Adaptive Decision Manager) is a preferable.

• Experience on NBA (Next Best Action) Designer is a plus.

• Experience on Pega Paid Media Manager is a plus.

• Hands on exprience at Pega or later versions is preferable

• Strong knowledge of object oriented concepts, design patterns.

• Define the application architecture, track and identify issues within it, work towards a solution

• Design/Redesign the application architecture to be more cost-effective considering performance and code quality

• Develop custom Pega activities to integrate / consume external platforms, services

• Demonstrated knowledge of SOA principles with integration experience using different protocols SOAP,REST etc..),

• Experience implementing Pega integration services using REST, SOAP and other XML-based technologies

• Excellent skills in any of the RDBMS tools like Oracle, MSSQL or DB2. Should be proficient in SQL commands, Should have knowledge noSQL databases.

• Strong knowledge on NoSQL databases like Cassandra, MongoDB.

• Experience implementing Pega data integration services access RDBMS and/or NoSQL databases.

• Experience with the entire SDLC process,

• Familiarity with Agile methodology.

• B2+ Level Proficiency in English
