Company: Vodafone

Location: Istanbul

Category: other-general

What you'll do

This role is responsible for L3 support, maintenance, plan and design of all Vodafone Turkey PAM Infrastructure to ensure high availability of systems and all services and keeping security policy and rules up to date. Also developing strategies by scoping out technology drivers to meet future needs, taking all necessary actions to avoid problems before they pose.

Who you are

- University degree (BSc./MSc.) in Engineering discipline (Electrical-Electronics, Computer Science or similar)
- Proficient in implementing and managing PAM solutions
- In-depth knowledge of Privileged Access Management principles, concepts, and technologies
- Strong understanding of access control, authentication, and authorization mechanisms
- At least 3 years of work experience in information security, network administration or IT security
- Telecommunications industry experience is an advantage
- Critical thinking with strong attention to details and follow up
- Having low level security understanding but ability to present it in a high level
- CyberArk certification(s) such as CyberArk Certified Delivery Engineer (CDE) or CyberArk Certified Trustee (CTP) is a plus
- Strong analytical deduction
- Being creative, problem solving and result oriented
- Fluent in English both written and spoken

- Effective verbal and written communication skills and strong interpersonal skills, good in reporting
- Demonstrated ability to work effectively with 3rd party suppliers and internal stakeholders
