

Turkey Jobs Expertini®

Cyber Security Expert (DevSecOps)

[Apply Now](#)

Company: Vodafone

Location: Istanbul

Category: other-general

What you'll do

We are a team of Cyber Security Designers. As DevSecOps Engineer, you will play a crucial role in enhancing software development and deployment processes by integrating security practices throughout the entire software development lifecycle

Design and implement security architecture for software systems

Implement, maintain and further develop DevSecOps tools.

Support to maintain the secure software development lifecycle (Secure SDLC) and continuously scan the source code and test the applications dynamically, follow & report all vulnerabilities to the relevant teams, ensure the remediations take place in accordance with the SLA.

Be a part of the team that leads Security Champions, act as the Security SPOC for them and implement the Secure Agile Development Standard

Identify opportunities to automate security tasks to increase efficiency.

Identify and communicate potential risks with appropriate mitigations.

Who you are

University degree (BSc./MSc.) in Engineering discipline (Electrical-Electronics, Computer Science or similar)

At least 4 years of work experience in Cyber Security

Experience in using tools for secure software development (SAST, DAST, IAST, SCA)

Knowledge of common classes of vulnerabilities and how to mitigate the risks in applications and infrastructure

Broad security knowledge and practical experience in designing risk-oriented security solution.

A diverse security background with knowledge in several areas, including layered security architecture, internet protocols, API security, mobile and web applications security, VPN, firewalls, WAF, IDPS risk and vulnerability assessments and compliance

Proven experience participating in multiple security programs, projects and initiatives

Good communication and collaboration skills to work with diverse teams and stakeholders

Experience working in complex operational ICT environments

Fluent in English both written and spoken

Relevant certifications in Cyber Security (OSCP or similar)
