

Data Centers Design and Implementation Senior Specialist

[Apply Now](#)

Company: Vodafone

Location: Istanbul

Category: other-general

Your dream job does exist.

Discover it at Vodafone!

Join our journey as we connect for a better future. Ready?

We are looking for a **Technology Centers Design and Implementation Senior Specialist**

First things first: Our Brand.

Here are the key behaviours that help us bring our Spirit and Purpose to life:

Earn customer loyalty: Small things do matter.

Experiment, learn fast: Just take the chance.

Create the future: That s possible.

Get it done, together: It s up to each of us to make it happen.

Here, everyone can feel free to be themselves and express their ideas.

We are proud to have the most flexible #hybrid way of working in Turkey.

Together with your team, you can decide which days to come to the office depending on your work requirements.

Another favorite: Meeting-free afternoons! Every Friday, arrival of the noon means we can start to take it easy: spend time working on our personal development or catching up with our team. We call this #CumaKafas (Friday mood :)).

And yes we are Agile! The world is constantly changing. And we cannot afford not to!

Our journey began by simplifying our organizational model and transforming into a more agile structure that now we use extensively, especially in our development processes.

Why is this role really critical to us?

The role contains following responsibilities across Vodafone Turkey Technology Centers including new and existing Data Centers and Switching Centers of Vodafone in Turkey and North Cyprus

How will you spend your time at Vodafone?

- Design and implement new data center and switching center
- Upgrade data center mechanical and electrical plants as per business needs.
- Experience in switchgears, generators, PDUs, chillers, AHU, CRAC, leakage & fire detection and suppression systems.
- Design, implement and follow up power, cooling, structured cabling and floor layout, by considering industry standards, requirements and best practices in line with the budget
- Coordinate vendor and subcontractor activities
- Communicate with internal customers to address their requirements and needs
- Plan and implement energy saving and cost cutting projects
- Plan and conduct audit & assessments in periodical frequencies at technology centers in perspectives of Site Efficiency & Optimization (As per CFD and PUE), Site Security & Resilience (Redundancy level, risks) and Information Security (in line with ISO 27001)
- Have good knowledge on data center physical infrastructure standards by global organizations TIA, ASHRAE,
- Plan project work flows, project organization and timeline and make essential revisions in the project scope and timeline
- Fulfill floor layout planning of each technology center and capacity provisioning of Infrastructure and Energy systems
- Provision the cost of each design activity and forecast future site requirements
- Make essential reporting to Vodafone Group IT, NW Core teams etc.
- Prepare periodic project progress reports/system status reports
- Prepare the engineering plans and site technical design packages/specs. for infrastructure and energy systems
- Create plans for system deployments at technology centers
- Fulfill desing assessment and risk&gap analysis at the existing technology centers
- Generate floor layout and site cabling design

- Do capacity planning on power and cooling infrastructures
- Prepare technical product specifications and installation guidelines
- Negotiate technical issues with vendors, manufacturers and suppliers
- Make essential tests and on-site trials/PoC for infrastructure equipment
- Follow up the field deployments of project/program phases
- Coordinate installation/decommissioning/re-homing of infrastructure and energy systems at existing and new mission critical centers
- Accomplish project on time and within budget
- Monitor/track/report progress of project plans/milestones
- Implement assessment deliverables to boost site efficiency
- Conduct and supervise installation subcontractors onsite
- Communicate with stakeholders at NW, IT and other internal customers
- Search new generation systems and best practices for OPEX saving and cost effectiveness
- Apply and deploy energy efficiency initiatives and methods at the technology centers
- Improve the site efficiency, lowering the PUE (Power Usage Effectiveness) metric
- Make forecasts for CAPEX and OPEX of energy related items and projects
- Follow up the energy consumptions of the technology centers

You are just the person we ve been looking for, if you have:

- Good knowledge and experience on the infrastructure technologies , power, cooling systems, structured cabling and site floor layout optimisation and design of data centers and switching centers
- Electrical-Electrical Engineering (ITU, YTU, IU, etc)
- Experience at least 3 years in a similar organization
- Coordination and organization ability, team-work approach
- Fluent in English
- GSM network/IT environment knowledge
- Candidates with renewable energy and alternative energy knowledge preferred
