Data Modelling Lead

[Apply Now](#)

Company: Vodafone

Location: Istanbul

Category: other-general

What you'll do

Your dream job does exist.

Discover it at Vodafone!

We are looking for a **Data Modelling Lead**.

First things first: Our Brand.

Here are the key behaviours that help us bring our Spirit and Purpose to life:

- Earn customer loyalty: Small things do matter.
- Experiment, learn fast: Just take the chance.
- Create the future: That's possible.
- Get it done, together: It's up to each of us to make it happen.

Here, everyone can feel free to be themselves and express their ideas.

We are proud to have the most flexible #hybrid way of working in Turkey.

Together with your team, you can decide which days to come to the office depending on your work requirements.

Another favorite: Meeting-free afternoons! Every Friday, arrival of the noon means we can start to take it easy: spend time working on our personal development or catching up with our team. We call this #CumaKafası (Friday mood).

And yes we are Agile! The world is constantly changing. And we cannot afford not to!

Our journey began by simplifying our organizational model and transforming into a more

agile structure that now we use extensively, especially in our development processes.

Why is this role really critical to us?

Enable single version of the truth through the provision of a structured Logical Data Model (LDM) focused on business needs and common data definitions

Act as an SME and design process for data & analytics

Act as a PO to manage DWH IT backlog.

Manage providing system functionality, dashboards and other reporting deliverables from business requirements and to carry out both functional and account management duties

Define opex and capex requirements in order to deliver Data and Analytics roadmap

Follow new technologies and proactively look for opportunities to improve Data Analytics environment and drive through to completion

How will you spend your time at Vodafone?

Enable single version of the truth through the provision of a structured Logical Data Model (LDM) focused on business needs and common data definitions

Evaluate and prioritize Data & Analytics projects based on business needs

Translate business requirements into conceptual, logical data models

Transform data into an enterprise information asset that is consistent, comprehensive and current

Lead providing a specialist data management service, data quality root cause analysis and recommendation of business improvement opportunities

Interpret business requirements and determine optimum Data & Analytics solutions to meet needs

Responsible for business architecture (how the business interface with the technology in a system oriented perspective), data models and structures

Work in collaboration with both business and technology to solve issues related to Data &

Analytics projects

Taking judgement on BI investments and recommendation to local leadership team

To proactively look for opportunities to improve Data & Analytics environment and work in collaboration with related departments

Ensure robust data controls are in place to drive data quality

Drive all associated data management opex and capex requirements in order to deliver Data & Analytics roadmap

Follow new technologies and proactively look for opportunities to improve data quality and drive through to completion

Align Data & Analytics vision and strategy to local market strategy

Ensure quality with Data & Analytics data management activities

Operational accountability and impact on service to customers

Managing operational performance of the Data & Analytics environment ensuring data integrity & quality

Engage with stakeholders in order to understand their business processes, imperatives, constraints and priorities

You are just the person we've been looking for, if you have:

Bachelor Degree in engineering or MIS, master degree is a plus

Demonstrated experience and expertise communicating with stakeholders in management level

Data knowledge is must, previous data management and telecommunication experience is plus

Excellent communication skills in English

Good Presentation Skills

5+ years' experience in similar position

Project management and analytical thinking skills

Experience with Data, Analytics and business intelligence reporting tools or technologies (Business Objects, Tabeau, Oracle SQL, Python, Power BI)

Understanding of business drivers and what data is and should be used for
