Design Engineer

[Apply Now](#)

Company: Hilti Group

Location: Ankara

Category: other-general

What's the role?

In your role as a Design Engineer, you will engineer and design applications up to medium complexity based on Hilti modular support systems within Hilti's Installation Business Unit portfolio. These applications will be based on Hilti's proprietary software suite "PROFIS Installation" and designed under guidance of a senior engineer or team leader. You will provide a basic engineering of anchor or direct fastening solutions and bill of materials to other Hilti functions (. supply chain) for further processing

Who is Hilti?

Hilti is where innovation is improving productivity, safety and sustainability in the global construction industry, and beyond. Where strong customer relationships are creating solutions that build a better future. Where there is pride and a sense of belonging across our 120 locations, carrying right into our lives and homes. Where people are exploring possibilities, leveraging their potential, owning their personal development and growing lasting careers.

What does the role involve?

In this role you will derive bill of materials from design work for the wider Hilti team, design modular support solutions in AutoCAD and provide basic engineering of anchor and direct fastening solutions using the Hilti proprietary software suite "PROFIS". Furthermore, you will be responsible for writing engineering reports for designed applications, while collaborating on global and regional projects with different departments within Hilti such as sales and logistics and basic value engineering (combining technical – commercial – logistics aspects)

for defined applications.

Finally, as a Design Engineer with Hilti, you will ensure the adherence to relevant codes and Hilti standards in project engineering and ensure the safe and Hilti rules compliant engineering of defined applications.

Hilti opened the Hilti BIM Experience Center in Rotterdam last year and has since then been offering visitors from around the world the Building Information Modelling (BIM) hands-on experience.

What do we offer?

Show us what you're made of and we'll offer you opportunities to move around the business – to work abroad, experience different job functions, and tackle different markets. It's a great way to find the right match for your ambitions and achieve the exciting career you're after.

What you need is:

Bachelor's Degree in Structural, Civil or Mechanical Engineering; Master's Degree is a plus

Minimum 5 years of structural or civil experience, experience in steel structure design is a plus

AutoCAD basic know how and experience using structural engineering software (R-Stab, SAP2000, STAAD PRO)

Understanding of BIM or plant design software (SmartPlant 3D)

Understanding of the correlation between technical and commercial aspects of engineering work

Strong analytical, conceptual and implementation skills

Empathy and ability to work with others in a multicultural environment

Proficiency in English & Turkish - written and verbal

Resident in Ankara
