[Apply Now](#)

Company: Fintech Company

Location: Gaziantep

Category: other-general

At Fintech Company (Permanent), in Portugal

Salary: €30.000 - €50.000

Expires at: 2027-06-18

Remote policy: Full remote

We are cutting-edge fintech company that revolutionizes financial management. Our innovative platform combines advanced technology with personalized financial insights, empowering individuals and businesses to make informed decisions, optimize investments, and achieve their financial goals. With secure data analytics and seamless user experiences, we bring simplicity and efficiency to the world of finance, empowering you to navigate the complexities of the financial landscape with confidence.

As a DevOps Engineer, you will be an integral part of our dynamic and innovative team, contributing to the design and implementation of robust and secure DevOps practices. Our company thrives on innovation, collaboration, and continuous improvement, and we're committed to providing exceptional user experiences through our platforms.

Responsibilities:

Collaborate with cross-functional teams to understand project requirements and design efficient DevOps pipelines.

Design, implement, and maintain our cloud infrastructure using platforms such as AWS,

Azure, or Google Cloud.

Develop and maintain CI/CD pipelines for seamless integration and delivery of software.

Implement and manage monitoring, alerting, and logging systems to ensure optimal performance and reliability.

Collaborate with development teams to establish best practices for software delivery, version control, and release management.

Optimize cloud infrastructure for cost efficiency and scalability.

Ensure high availability and disaster recovery of our systems.

Troubleshoot and resolve infrastructure and performance issues in a timely manner.

Stay up to date with industry trends and emerging technologies in cloud computing and DevOps to suggest new ideas and improvements.

Main requirements

Minimum of 2 years of experience as a DevOps Engineer.

Strong understanding of cloud platforms such as AWS, Azure, or Google Cloud.

Experience with infrastructure-as-code tools like Terraform or CloudFormation.

Proficiency in scripting languages (e.g., Bash, Python) for automation tasks.

Hands-on experience with CI/CD pipelines and associated tools (e.g., Jenkins, GitLab CI/CD).

Knowledge of containerization technologies such as Docker and orchestration tools like Kubernetes.

Familiarity with configuration management tools such as Ansible or Chef.

Understanding of networking concepts and protocols.

Enhance system security by implementing best practices, conducting vulnerability assessments, and participating in security audits.

Strong problem-solving and analytical skills.

Benefits & Perks

Highly competitive salary and comprehensive benefits package.

Flexible working hours

Collaborative and inclusive work environment that values creativity and innovation.

Opportunities for professional growth and career advancement within a rapidly expanding organization.

Access to cutting-edge technologies and tools to support your data science initiatives.

Work-life balance and a supportive culture that values your personal well-being.
