Company: Massive Bio, Inc.

Location: İstanbul

Category: other-general

Massive Bio is a rapidly growing health-tech startup founded in 2015 to provide every cancer patient with access to clinical trials regardless of their location or financial stability. Our proprietary patient recruitment and enrollment enablement solution for oncology clinical trials solves every point of friction in traditional clinical trial enrollment. Privately held and headquartered in NY City, our passionate changemaker team is looking for DevOps Engineer to join our team in our Istanbul, Turkey office. As a member of the Software Development team, DevOps Engineer's responsibilities include setting up CI/CD workflows, deploying product updates, identifying production issues, and implementing integrations that meet customer and developer needs. Ultimately, they will execute and automate operational processes fast, accurately, and securely. Reporting to the DevOps Engineer, this new hire will: Ensure solid, highly available, scalable, and performant solutions across both applications and infrastructure. Manage the whole lifecycle of our Azure development and production environments (manage configurations, monitor changes, respond to issues, etc.). Ensure that systems have proper monitoring and alerting. Ensure ongoing maintenance of our security, cost, and redundancy status. Manage Vulnerability Scanning. Familiarity with security and other related frameworks. (ISO27xxx, NIST CSF). Secure the company's confidential data's integrity, and availability, taking necessary physical and technical measures. Support the engineering teams on automated deployments and infrastructure. Candidate Profile: Min. 2 years of experience in DevOps/DevSecOps in a cloud environment. Experience in the implementation and maintenance of containerization and monitoring tools, including Docker, Kubernetes, Istio, Helm, and Prometheus.

Experience in CI/CD/CT processes, using tools such as Jenkins, CircleCI, GitLab, Azure DevOps or others. Experience working with Linux systems from kernel to shell and beyond. Experience in setting up VMs, Gateways, file servers, VPN, and private networks. Experience with implementation of unit, integration, and system testing. Excellent knowledge of Bash and YAML scripting. Experience with Jira and Agile for development processes, Git, and continuous integration. Bachelor's degree required, engineering is preferred, or a related field. Proven results influencing stakeholders and displaying improvements. Ability to translate complex problems and ideas into easily understood descriptions. Ability to work independently. Self-starter, can-do attitude, ability to multitask and prioritize. Experience in healthcare technology is a bonus. High level of speaking proficiency in English to be part of international calls when needed. Living in Istanbul, preferably on the Asian side. The location is Kozyatagi, Istanbul, and should be able to work at the office at least 2/3 days a week at the office. No military obligation for candidates.
