DevOps Engineer (New Grad)

Apply Now

Company: Dream Games

Location: Şişli

Category: other-general

Job Description

We are looking for a passionate new grad who wants to gain experience in DevOps systems. DevOps Engineer, who will design and implement scalable systems. This is an exciting opportunity to work closely with our development teams to address their needs and scale out the infrastructure of our attribution pipeline and related technologies. You take ownership of our infrastructure over various locations and continuously scale it, making sure that our servers run smoothly and at their highest efficiency.

At Dream Games, all team members have a genuine chance to contribute to the final product and have an impact on the company. If you want to be a team member of a fast-growing company, you might be the person we are looking for!

Responsibilities

Building and supporting infrastructure and developer tools to improve game development processes

Building advanced automated build, test, and release infrastructure

Providing troubleshooting and timely resolution of the system, network, and infrastructure problems

Identifying and solving critical problems and preventing them from reoccurring via root cause analysis and automation

Requirements

Fresh graduate from the university's field of engineering

Interest in cloud providers such as GCP and AWS

Interest in Infrastructure as Code

Knowledge of Containerized technologies and Container orchestration frameworks

Passion and interest in games

Appreciation and understanding of teamwork

Compensation & Benefits

Monthly net salary is 110.000 TL

Health, dental, and vision insurance with %100 coverage

Relocation support as needed

Protecting your privacy and the security of your data is a top priority for Dream Games. We collect and process your personal data as confidential as part of the recruitment process. Please read our and to know more details.
