DevOps System Engineer - Digital Systems Engineering

Apply Now

Company: Vodafone

Location: Istanbul

Category: other-general

Your dream job does exist.

Discover it at Vodafone!

We are looking for a **Devops System Engineer_Digital Systems Engineering**

First things first: Our Brand.

Here are the key behaviours that help us bring our Spirit and Purpose to life:

- Earn customer loyalty: Small things do matter.
- Experiment, learn fast: Just take the chance.
- Create the future: That's possible.
- Get it done, together: It's up to each of us to make it happen.

Here, everyone can feel free to be themselves and express their ideas.

We are proud to have the most flexible #hybrid way of working in Turkey.

Together with your team, you can decide which days to come to the office depending on your work requirements.

Another favorite: Meeting-free afternoons! Every Friday, arrival of the noon means we can start to take it easy: spend time working on our personal development or catching up with our team. We call this #CumaKafası (Friday mood).

And yes we are Agile! The world is constantly changing. And we cannot afford not to!

Our journey began by simplifying our organizational model and transforming into a more agile structure that now we use extensively, especially in our development processes.

Why is this role really critical to us?

Ensure that Vodafone Digital Services Up & Running with Automation perspective starting from development to production.

How will you spend your time at Vodafone?

- Responsible & service owner for Digital App&Web channels products and services
- Responsible for all 7/24 Level 2 Operations in a proactive manner (Deployments, Monitoring, Troubleshooting, SLA/OLA Management, Service Capacity Management, Service Network Management, Technical Contract Management, Service OPEX Management, Service Incident Management, Service Problem Management, etc.) for corresponding products and services
- To ensure the service delivery is meeting the business and operational standards
- To ensure appropriate measurement and reporting of service performance, usage and availability is in place in order to analyse the trends to identify and prioritize improvements
- Implementing correct measurement of capacity demands
- Implementing DevOps tools and life cycle processes on responsible services.
- Implementing Operational automation processes (test, deployment, alarm).
- Working in multiple Agile Squad teams and delivering outputs per each team
- Maintaining a close relationship with the respective departments (marketing, project office, infrastructure, solution) to be aware of any changes to or additions to the current scope of the services
- Leading micro groups and projects

You are just the person we've been looking for, if you have:

- Significant experience on UNIX/ Linux/Windows Operating system.
- Significant experience on Application servers Weblogic/Tomcat
- Significant experience of UNIX/Linux Shell Scripting, Oracle PL/SQL and MSSQL systems
- Significant experience on Devops&Agile methodologies.
- Significant experience with implementing CI & CD pipelines and tools, Git, Jenkins, Nexus
- Significant experience on Microservice architecture, technologies
- Significant experience with Elasticsearch, MongoDB, Cassandra, Kong, Redis, Celery, Kafka, Hazelcast, RabbitMQ

- Significant experience on OCP, AWS, Google Cloud etc.
- Significant experience with Kubernetes, Swarm
- Goog command of English
- Good team player skills
- Ability to work with ambitious timelines in a dynamic, high-growth environment
- Strong communication / interpersonal and decision making skills – ability to balance conflicting interests
- Familiar with working in an international environment
