

## Electrical Plan Approval Engineer

[Apply Now](#)

Company: RINA

Location: İstanbul

Category: other-general

RINA is currently recruiting for a **Electrical Plan Approval Engineer** to join its office in **İstanbul** within the Marine South East Europe & MEA Region Division.

### **Mission**

This role focuses on supporting the elaboration of detailed plan and design reviews, resolving issues related to conflicting design requirements, ensuring client requirements and applicable standards are met

Projects could include the approval of new building, conversion, and existing vessels and yachts.

### **Key Accountabilities**

Review and approve drawings of electrical and automation systems, including autonomous ship technology and cyber security, on ships, offshore units, and marine equipment, in compliance with Class Rules and Statutory Regulations, for new buildings, ships in service, and ship's conversions.

Assist clients during the design and construction phase, providing guidance and support related to electrical and automation systems on ships, including autonomous ship technology and cyber security.

Provide support for the elaboration of detailed marine engineering plan review, in compliance with applicable RINA rules, international conventions and contractual requirements.

Provide support for the resolution of issues related to conflicting design requirements and material standards.

Provide direct day-to-day support and oversight of project elements, visit sites to take measurements.

Provide direct or indirect support to engineers or engineering teams by gathering data, submitting documentation to officials and other day-to-day duties.

Prepare the project deliverables (technical reports, project performance documentations and engineering drawings, etc.) .

Take ownership and responsibility over the financial progress of assigned tasks.

Understand and apply project management concepts providing feedback to project manager, serve as reference for the escalation of issues.

Manage simple projects assigned applying project management concepts and techniques.

Assess minor structural problems for internal/external clients to determine solutions with minimal supervision.

Answer contractor questions on behalf of the supervising engineer, and serve as liaisons between engineering and construction personnel.

### **Qualifications and professional experience**

- Degree in Electrical Engineering or equivalent;
- English proficiency;
- Knowledge of relevant Class and Statutory Regulations;
- 3+ years of relevant work experience at IACS Classification Societies.
- Analysis and Problem Solving;
- Decision Making;
- Ability to work in a team and on tight schedules;
- Ability to manage conflicts and to negotiate;
- Pro-active customer focused approach.
