

## Electrical Reliability and Automation Engineer

[Apply Now](#)

Company: Cargill

Location: Balikesir

Category: other-general

### Job Purpose

and Impact

The Instrumentation and Automation Engineer will apply technical knowledge to design, develop and maintain overall governance on standards, application, gaps, solutions and measurements to increase production quality, efficiency and volume for the business. In this role, you will perform day to day activities related to instrumentation and automation engineering to enable projects and improve our capabilities by providing engineering support for the organization.

### Key Accountabilities

Apply general knowledge of principles, terms, and practices of instrumentation and automation engineering to support the design and build of safe and reliable operations.

Coordinate and provide direct support and delivery of services for an operation.

Execute and support instrumentation and automation engineering standards and deliverables in capital projects.

Monitor and support progress for projects with low to medium levels of complexity and ensure appropriate resource allocations and portfolio prioritization.

Implement, monitor and track audit control mechanisms within area of scope to track performance and provide actionable solutions that contribute to improvements.

Support more senior team members to assess instrumentation and automation engineering

development and application opportunities and further dissemination across common practice areas.

Support, analyze and develop conclusions regarding areas of improvement and identify opportunities to improve performance and determine acceptable risk tolerance.

Independently solve moderately complex issues with minimal supervision, while escalating more complex issues to appropriate staff.

Other duties as assigned

#LI-DB2

## **Qualifications**

### **Minimum Qualifications**

Bachelor's degree in Electrical & Electronics Engineering

Minimum of 3 years of related work experience

Minimum Upper Intermediate level of English

Ability to read P&ID's.

Work well in a team or individual environment and be a self-starter

Utilize automation workflow process as part of CMMS

Experience in predictive maintenance technologies (IR and Ultrasound Tools, etc.)

Other minimum qualifications may apply

### **Preferred Qualifications**

Experience in Food Process or Chemical Process Industry

Knowledge of reliability centered maintenance, planning and scheduling

Experience creating complex tests and analysis

Ability to configure and program a variety of control systems including Distributed Control Systems (SIEMENS PCS7 DCS), Programmable Logic Controller (SIEMENS S7 PLC), and Human Machine Interface (HMI) systems.

Ability to troubleshoot a range of automation, electrical, and instrumentation systems.

### **Our Offer**

We provide a fast paced stimulating international environment, which will stretch your abilities and channel your talents. We also offer competitive salary and benefits combined with outstanding career development opportunities in one of the largest and most solid private companies in the world.
