[Apply Now](#)

Company: Verify, Inc

Location: Ankara

Category: other-general

### Overview

**Location: Ankara, Turkey**

**Schedule:** Approx 16 hrs / week; could increase after initial on-site

**Contract:** 60 days with possible extension

Seeking an experienced **Aerospace Quality Source Inspector** local to Ankara, Turkey to support inspection and root cause corrective actions regarding current quality issues. As the on-site focal for our customer, ensuring quality product, including but not limited to: machined and sheet metal components within a rear pressure bulkhead assembly.

### Job Description:

Parts will be inspected to engineering drawings, customer purchase order(s), industry standards, and specifications.

The inspector will be required to report inspection accept / reject information directly to the customer via web application.

Recommending necessary adjustments and changes to production processes

Containment of nonconforming product

### Requirements:

Candidate must have practical experience performing in-process and final inspections on complex machined parts, composite parts, assemblies, and / or sub-assemblies.

The inspections will be performed to engineering requirements specified per ANSI Y14.5 –

## Geometric Dimensioning and Tolerance (GD&T)

Must have the ability to read / interpret engineering drawings and Purchase Orders (POs).

The candidate must have experience using various mechanical inspection tools, such as micrometers and calipers.

Experience performing First Article Inspections (FAIs) in accordance to the AS9102 standard and knowledge is required. Ideal candidate will have a minimum of five years' experience performing inspections in aerospace or military / defense manufacturing with proficiency using Microsoft Word and Excel.

Candidate should be computer savvy and own a laptop for this assignment.

Minimum 5 years mechanical source inspection experience. Experience must be within the last 2 years in aerospace or military / defense manufacturing.

Minimum 2 years of hands on first article inspection (FAI) experience to AS9102. This must be a strong knowledge and understanding.

Minimum 5 years' experience inspecting Complex Machine Parts/Assemblies/Composite Parts.

Candidate must have a strong knowledge and understand of GD&T per ANSI Y. 14.5

Knowledge of tight tolerance is required.

Candidate must have mobile phone availability and their own laptop, with e-mail and internet access, to bring on site to the supplier location.

Strong computer skills. Source inspection information is input into the customer's system in SAP.

**Will be working as an independent contractor (1099).**

**Must have LLC/DBA or able to obtain an LLC/DBA**
