

Turkey Jobs Expertini®

Electronic Design Engineer

[Apply Now](#)

Company: INFINIA

Location: Ankara

Category: other-general

INFINIA is a **human-centric design & innovation company** that designs and develops new technologies, products, and experiences across three main business divisions:

Experience Design Division brings digital and physical spaces together to maximize user/customer engagement. We design and develop custom exhibition products to create audiovisual and immersive experiences.

Products & Development Division provides on-the-shelf products in the marine, hospitality, advertisement, and IOT Sector

Technology Division designs, develops, and manufactures cutting-edge technologies from IoT devices to satellite systems to solve customers' most challenging operational problems.

We invite you to explore the opportunities to be a part of a dynamic team that thrives on pushing the limits of what's possible to shape tomorrow.

Upon becoming a part of our team, you'll have the chance to collaborate with highly talented and seasoned professionals, engage in large-scale global projects that offer international expansion prospects, and utilize cutting-edge future technologies.

Responsibilities include but are not limited to

Collaborating with a multidisciplinary team to design and develop electronic systems that enhance the human experience.

Assisting in the design, testing, and validation of electronic circuits and PCBs that seamlessly integrate physical and digital elements.

Creating and maintaining detailed documentation, including schematics, BOMs, and design reports, to ensure a holistic approach to product development.

Working on debugging and troubleshooting electronic hardware issues, identifying solutions that align with our design philosophy.

Participating in prototype development and testing, working to refine and perfect the user experience.

Staying informed about industry trends and emerging technologies to contribute fresh ideas and solutions to our innovative projects.

Requirements

A Bachelor's Degree in a relevant field, preferably in Electrical/Electronics Engineering.

3-5 years of experience in Electronic Design.

A profound understanding of electronic circuit design principles and a deep appreciation for human-centric design.

Experience with PCB design and layout software, such as Altium, Eagle, or KiCad.

Strong interest in microcontrollers, digital signal processors, and analog circuits.

Proficiency in using electronic design and simulation tools.

A basic understanding of firmware development, including C/C++ programming.

Exceptional problem-solving abilities with an unwavering attention to detail.

Excellent communication and collaboration skills.

The ability to work efficiently in a dynamic, fast-paced environment.

Benefits

Best reasons to join INFINIA

If honesty, open communication, curiosity, and continuous learning matter to you, you should apply INFINIA. Besides the culture, here are a few reasons to apply;

Development Support Focus on your growth with annual training support. We encourage and financially support your participation in the training sessions you wish to attend.

Enrich Your Social Life Spice up your social life by choosing perks from the INSTORE App. Options include gym memberships, gift cards, workshops, venue tickets, and more.

Comprehensive Remuneration Package Your hard work matters to us. That's why we offer a comprehensive remuneration package consisting of different pillars.

Health Insurance Your health comes first. We ensure your well-being with comprehensive health insurance coverage.

Birthday Leave Your birthday is special to us! Enjoy an extra day off to celebrate your birthday.

The future of technology and innovation is waiting for you. Find out more information about INFINIA!
