## Frontend Developer

[Apply Now](#)

Company: Maker

Location: İstanbul

Category: other-general

At Maker (Permanent)

Expires at: 2024-09-13

Remote policy: Global remote

### What We Do?

Maker is an engagement platform built from the ground up to help deliver the richest, most compelling content for commerce. We help online retailers and brands enhance existing websites with compelling content, dramatically increasing engagement, conversion and revenue growth.

We've combined the best of design, web-publishing and analytics tools in a single platform that can enhance any existing site with 10x richer content with zero code, development cost or risk.

Marketers and designers use our software to create, source, publish & optimize interactive content for their product pages, landing pages, lookbooks, blog posts, user-generated stories and more.

Our customers include Sony, Diesel, Ghurka and many others. Checkout [maker.co](https://maker.co) to discover stories behind 2000+ brands and their products.

### Role Overview

Maker's whole engineering team embraced ReasonML 2 years ago and later moved to ReScript. These days all new functionality is written in ReScript on both frontend and backend. We're looking for product-thinking frontend and backend engineers who are interested in new technologies and are constantly learning new things. ReScript/ReasonML as well as functional programming experience would be great but is not necessary.

JavaScript experience with React or Node.js is required.

As a Frontend developer, you'll be responsible for the architecture, design, development, and testing of our design platform and contribute to engineering best practices, documentation, and architecture decisions.

You will also be required to support and mentor other engineers, including pair programming and pull request reviews.

## **Main requirements**

Worked on key functionality for a cloud-based product

a get it done attitude and a background of delivering superb work, again and again experience building and delivering React/Redux applications that have seen actual production usage.

an understanding of the latest JavaScript features

an understanding of common browser APIs and recent extensions to the HTTP protocol as they relate to frontend development.

an understanding of how to write secure frontend code and an awareness of common web application security vulnerabilities.

you must be familiar with testing and have the ability to write unit tests/specs (we use popular JavaScript testing frameworks) by collaborating with the engineering, product and the design team, you will be required to add more features to our landing page builder to enable creators to create unique designs

should have recruited (including sourcing personally, or from your own network or recruitment firms) and managed high performing technical teams (comprising of front end

developers, back end developers, full stack developers, architects, QA- s) of at least

5-10 people on a day-to-day basis through proven performance management discipline
