Frontend Developer (Petal Search & Map)

Apply Now

Company: Huawei Telekomünikasyon Dış Ticaret Ltd

Location: Turkey

Category: other-general

We are a dedicated team developing Petal Search which is the most prestigious ongoing search engine project in the world. Petal Search have accumulated 30 million users in 50+ different languages include English, Chinese, Turkish, Arabic and many others. It is launched in 170+ different countries by now. Our vision is to achieve everything is searchable and to be "one of the three in the world as Petal Search.

Petal search supply search everything include general search like web, news, image, music, video, voice, knowledge, and multiple vertical search like apps, shopping, travel, local service, life assistant, and so on.

Petal Search has been developing in Huawei Turkey R&D Center which is one of the largest R&D investment of Huawei located outside of China. We have fully End-to-End team here include Marketing, Product Managers team, Development and AI Research team, User Growth and User Behavior Insight team, Ecosystem , Evaluation and Data Analytics team.

In this position, you will have a chance to be involved in end-to-end development of various search engine products and features. Whether you identify as front-end or back-end developer, or even both, you will find opportunities to show your skills and improve them. You will be a member of cross-functional team where your efforts can directly impact how the search engine works and observed by real-world users.

We are looking for a Frontend Developer for our Search Engine team.

Requirements

Up-to-date to current state of Web development: HTML5, CSS3 (Processors such as *Sass*, *Less*) and modern JS standards (ES6 or above), libraries and tooling such as *TypeScript*, *Babel*

Proven experience in modern JS frameworks. VueJS is preferred but others such as *React*, *Angular*, *Svelte* are OK too.

Framework level ecosystem experience *Vuex*, *NgRx*, *Redux* ...

Solid skills in Unit Testing and related tools (e.g. *Jest*, *Jasmine*, *Karma*)

Experience in development essentials: source control (e.g *SVN*, *Git*, *Mercurial*), CI/CD tools and container platforms (such as *Jenkins*, *Docker*), dependency managers *NPM*, *Yarn*...)

Experience with development & build tools such as *WebPack*, *Rollup*, *Gulp*...

Experience in *NodeJS*, *Python*, or other backend technologies

Experience with server-side rendering

Following are plus:

Experience in *NodeJS*, *Python*, or other backend technologies

Experience with server-side rendering
