Company: Pointr

Location: Turkey

Category: other-general

Our Story Pointr is a global leader in indoor location technology. Our mission is to deliver reliable, scalable, and intuitive location experiences to connect people with and within buildings across omnichannel Web, Mobile, and Kiosk platforms. Our Deep Location platform has revolutionized the indoor positioning, smart building, and IoT markets. With several Fortune 100 clients across 27 countries and more than 1,000+ buildings already, we have promising plans for the years to come. We have distinguished ourselves in the marketplace by growing around three core values: Ownership, Harmony, and Scale. These values are at the heart of every role, as we collectively create the future of indoor location technology.

**Role Overview** Reporting to the Mapping and Content Lead, you will be responsible for undertaking GIS and CAD data preparation, floor plan digitization, data management, analysis, mapping, and visualization on various projects. You will assist in the delivery of project-related tasks to meet the time frame and quality targets, meeting or exceeding expectations.

**Core Responsibilities** Undertaking indoor mapping, analysis, data capture, data management, and geoprocessing. Preparation of AutoCAD and GIS drawings, including 2D maps and engineering drawings for digitization. Extraction and formatting of AutoCAD data into GIS formats. Working both with other members of the GIS team and on your own initiative to produce GIS deliverables to tight deadlines. Assisting with day-to-day administrative tasks. Contributing to the technical development of the GIS team through sharing ideas and innovations. Communicating client requirements to other staff. Performing other duties and responsibilities as required from time to time by your manager.

**Minimum Qualifications** Experience with AutoCAD and GIS for indoor mapping Experience with Python

and Python Libraries to analyze, adjust and manipulate spatial data. Understanding & keen interest in floor plans, maps, geography, and IT. Excellent written and verbal communication skills. Ability to work well within a team environment. Good attention to detail. Ability to identify innovative solutions to problems. Well-motivated and able to work to tight deadlines. Desire to learn and build a career within a smart-tech environment applying GIS to the environment, geoscience, and infrastructure projects. Preferred Qualifications Basic understanding of digital cartography and geomatics. Working knowledge of some of the following packages: Microsoft Excel, QGIS, AutoCAD Ability to optimize, transform, and convert CAD floor plans and/or GIS files programmatically A Level in geography or a related subject. What Do We Offer? Competitive base salary and potential for equity Ability to learn in a fast-growing global tech startup Friendly, helpful, and smart team Flexibility to set your own schedule and agenda Inclusive, international environment spanning 10 countries Private health care 5 days of paid leave during your first year Company-paid parental leave Powered by JazzHR
