

Incoming Material & Equipment Inspector

[Apply Now](#)

Company: Assystem

Location: Mersin

Category: other-general

Company Description

Finding solutions to climate change is the priority of the 21st century, and means switching to low-carbon energy. At Assystem, our mission is to accelerate the energy transition worldwide. To achieve this, our 7,000 Switchers combine their historical engineering expertise and project management with digital technologies.

In our 12 countries (Europe, Middle East, Asia) of operation, we are working on the production and distribution of low-carbon electricity, through the development of nuclear and renewable energies. We are also supporting the modernisation and development of energy grids, managing the setup and siting for new transmission and distribution networks, and using hydrogen to decarbonise the transport and industry sectors.

Assystem in Türkiye, is renowned for working with the public and private sectors.

Specializing in ESIA studies, site investigations, and laboratory research, the company offers vital site supervision owners and lenders engineering services. Notably, Assystem in Türkiye plays a pivotal role in major projects like power generation, and the construction of the Akkuyu nuclear power plant.

Job Description

Incoming Material & Equipment Inspector is in charge of performing predefined checks regarding the conformity of material and equipment, including those considered as important

for nuclear safety, delivered on the NPP construction site and the conditions of their preservation until their use or installation for the construction.

Ensure that the material and equipment to be used for construction are compliant with the approved technical specifications and in good condition

Verify that the conditions of preservation of the equipment are respected until its use for construction

Ensure the traceability of the inspections performed, of the defaults and deviations observed, and of the non-conformities issued

Verify that defaults, deviations, or non-conformities are properly corrected

Ensure inspection activities are performed safely

Qualifications

Undergraduate diploma in civil or mechanical field (High school + 4 years)

3 years in inspection and/or in quality assurance/quality control

5 years minimum of professional experience in construction or industrial projects

Experience in incoming material and equipment control (will be a plus)

Experience in a Russian construction project (will be a plus)

Responsibilities:

Take knowledge of Akkuyu NPP Project referential (norms and standards, specifications, procedures, etc.) related to the material and equipment to be inspected

Issue comments on this documentation if deviations or missing points are detected regarding the applicable referential

Prepare inspections by identifying the elementary controls that will be done, in

accordance with the law 30024 and with the right level of details expected including the elaboration of necessary checklist

Conduct incoming inspections on NPP worksite to verify the conformity and the preservation conditions of the concerned material/equipment

Elaborate Work Inspection Reports for keeping record of the content and the results of the inspection performed on site

Describe and record the defaults or deviations observed during the inspection and follow-up their resolution

Perform an assessment on the defaults and deviations recorded, and when decided, describe and write a non-conformity notification, then monitor the corresponding corrective and preventive actions

Launch when necessary independent tests on samples (i.e. rebar, etc), to be performed by accredited laboratories and follow up the results

Respect the existing AEOS NCIO project Quality Assurance processes and HSE requirements

Contribute to the elaboration of the AEOS NCIO Project Monthly Report, by providing information on inspection activities carried out during the month

Attend, on request, internal or external technical meetings

Interfaces:

Belong to the AEOS NCIO Inspection Team

Report to the relevant Inspection Coordinator (civil, mechanical, electrical) or to the Inspection Team Manager and follow their instructions

Notify the relevant Coordinator and the Inspection Team Manager of defaults, deviations, and non-conformities and their resolution status

Interface with the AEOS NCIO Project Support Team, on documentation management topics and for the elaboration of the Monthly Report

Respect the instructions given by the QHSE Team regarding Quality Assurance and HSE requirements

Communicate and exchange on a daily basis with all the stakeholders involved in the incoming material and equipment processing

Knowledge, Skills, and Behaviours:

Knowledge:

Knowledge of ISO 9001 on quality management

Knowledge of GOST-24297-2013: incoming control of products basic provisions

Knowledge of ISO 2859-1 on sampling for tests (will be a plus)

Knowledge of TS EN 708: steel bar for concrete (will be a plus)

Knowledge of TS EN 1090: steel structures and aluminium structures (will be a plus)

Fluent in Turkish - read, spoken, and written

Fluent in English - read, spoken, and written

Fluent in Russian - read and spoken (will be a plus)

Proficient in Microsoft Office software

Skills:

Ability to quickly understand technical requirements (e.g., specifications, drawings, codes, norms)

Ability to write technical documents and reports

Good written and verbal communication skills

Ability to communicate proactively in a multicultural environment

Ability to observe meticulously to detect non-compliances

Behaviour:

Impartial and upright

Resistant

Organised

Rigorous

Additional Information

We are committed to equal treatment of candidates and promote, as well as foster all forms of diversity within our company. We believe that bringing together people with different backgrounds and perspectives is essential for creating innovative and impactful solutions. Skills, talent, and our people's ability to dare are the only things that matter!. Bring your unique contributions and help us shape the future.
