Java Engineer

[Apply Now](#)

Company: Dreamix Ltd.

Location: Turkey

Category: other-general

Dreamix was founded 17 years ago by passionate IT students, who wanted to create the dreamiest workplace where everyone is heard, works under transparent management, and lives up to their full potential. Now, many years later, we provide end-to-end product development for renowned healthcare, fintech, and transport companies from Germany, the UK, Switzerland, Silicon Valley, and more.

We believe the employer-employee relationship must be in the form of a partnership, not a transaction. You can be sure that we'll invest as much as we can in your development, but we expect the same commitment to Dreamix. Our culture is defined by our actions not by what we say.

Currently, we are seeking a highly skilled **Java Engineer** who will contribute significantly to the design, development, and enhancement of diverse software solutions across various domains.

If you join our team you will:

Develop and maintain high-quality Java applications, adhering to coding standards and best practices.

Conduct software testing and debugging to ensure optimal performance and reliability.

Effectively communicate project status, issues, and resolutions to project stakeholders.

Participate in code reviews to ensure quality and code correctness.

Stay up-to-date with the latest industry trends and technologies to continuously improve development practices.

Collaborate with the team to identify areas of improvement and implement necessary changes.

What qualifications you should have:

Minimum of 2 years of practical experience in developing web applications using Java, including a good understanding of core Java concepts, object-oriented programming (OOP), and design patterns.

Bachelor's degree in Computer Science or a related field.

Strong understanding of related technologies including Spring Boot.

Experience in API Design including REST and GraphQL.

Experience with AWS and MySQL as well as good understanding of SQL and Hibernate.

Familiarity with Agile development methodologies, especially Scrum.

Fluent in English, both written and verbal.

Good communication and problem-solving skills.

A strong passion for software development and a proactive attitude towards learning new technologies.

What you'll get:

A warm and supportive work environment where you can reach your full potential.

Flexible working hours that allow you to balance your work and personal life.

Unlimited home office to help you stay productive and focused.

Opportunities for professional development, including certifications and training.

Additional benefits for academic teaching and speaking engagements.

Knowledge-sharing sessions where you can learn from our Dreamix team.

Team and company-wide events that bring us together.

Amazing week long summer office and winter office initiatives.

Additional health insurance to ensure your well-being.

If you want to explore this journey, give us a sign by sending us **CV** your

Only shortlisted candidates will be contacted. The confidentiality of all applications is assured!

By applying for this job, you voluntarily agree and submit your personal information.

Any personal data that you provide will be processed in strict confidentiality by Dreamix Ltd. Only for the purposes of selection and recruitment and will not be transferred to other data controllers unless required by law. It will be stored, processed, retrieved, and deleted in accordance with the GDPR.
