JAVA Test Automation Engineer (Hybrid)

Apply Now

Company: Orion Innovation

Location: Istanbul

Category: other-general

Orion Innovation is a premier, award-winning, global business and technology services firm. Orion delivers game-changing business transformation and product development rooted in digital strategy, experience design, and engineering, with a unique combination of agility, scale, and maturity. We work with a wide range of clients across many industries including financial services, professional services, telecommunications and media, consumer products, automotive, industrial automation, professional sports and entertainment, life sciences, ecommerce, and education.

We are looking for **JAVA Test Automation Engineers** who can take the ownership and proactively drive all aspects of automating UI, E2E and **REST API testing**.

Required Skills:

English is must for daily scrum meetings, reporting and documentation.

Strong working knowledge of **JAVA** (This is **main tool**).

Min. 2 years of experience in JAVA test automation.

Recent hands-on experience in **REST API testing** and test automation.

Recent hands-on experience in **front-end test automation tools and libraries such as Selenium, TestNG, Junit, Gatling and others.**

Extensive working knowledge of relational databases, strong **SQL** skills.

Strong knowledge of **Linux** and command line **shell scripting**.

Good understanding of **Testing Methodologies, test planning, system dependencies and product integration phases.**

Good understanding **Agile Methodology.**

Strong **Teamwork** and communication skills.

QA Key Objectives:

QA process to align with the 2 weeks sprint process followed by development – Agile methodology.

Preparation of test strategy and test plans.

Preparation of **test scenarios** for the automation activities, test cases written using behavior driven development.

Functional QA: To write and execute 100% of testcases within same sprint.

Automation QA: To develop, execute and run all tests as part of **CI/CD pipeline.**

Identify defects, report them clearly in related tools and track them to completion.

Report metrics precisely each week (maintained as part of Teams).

Developing and implementing framework libraries to support test automation scripts and validating execution reliability.

Will be a plus

Knowledge of JavaScript and Python.

Knowledge of HTTP protocol, Websocket.
