Manager, Global Projects

[Apply Now](#)

Company: TPI Composites

Location: İzmir

Category: other-general

TPI is the largest .-based independent manufacturer of composite wind blades for the high-growth wind energy market supporting global wind turbine manufacturers. TPI operates composite products manufacturing facilities in North America, Europe and Asia.

TPI has over five decades of innovation and expertise in manufacturing large-scale composite structures of highest quality at a competitive total delivered cost to our customers. Our advanced composites manufacturing technology allows us to build near aerospace grade parts at industrial prices.

We are looking for an enthusiastic and talented engineer to join us as an “**Global Projects Manager**” with in **Global PM Department**.

What will be your contributions:

Tracks and monitors the overall project status for key projects

Ensures robust planning and risk mitigation on key projects

Conducts high level executive (Steerco reviews) with stage gate meetings at appropriate times

Ensures that the projects are meeting cost and schedule targets and following common processes and standards

Interfaces with the Business Development organization during the early phases of the project

Coordinates weekly reporting with key stakeholders and customers

Engages proactively with stakeholders on the respective levels of their organizations to ensure alignment of expectations and continuous improvement of customer satisfaction

Provides performance monitoring, information and reporting; helps diagnose root cause of problems and mitigate risks

Ensures teams are taking corrective action as necessary to deliver complete scope, desired quality and timeliness of projects

Creates and promotes a culture of collaboration, team-work and fun while delivering to or exceeding expectations

The Global Project Manager leads project activities related to internal key projects. Some of the projects within the area of responsibility are launching new production lines, new factories or global implementation projects across all TPI sites.

Ensuring the project is delivered on schedule, following the PMP at TPI guidelines and procedures, within budget and cost are the key mission of Global PM. Projects are executed under a robust planning and risk mitigation.

He/she will ensure common processes and standard implementation of metrics across key projects. Key stakeholders include Operational Managers, Business Development, Local Project Managers and Senior Executive Team at TPI.

What will be decisive:

BA/BS in engineering related field of study

Advanced degree preferred but not required

3+ years relevant Project Engineering, Process Engineering or Project Management experience

Knowledge of project management methodologies, tools & techniques

English speaking is a must

Bias of action, ability to get things done

Ability to deliver effective presentations to executive management

Ability to creatively operationalize concepts and strategies that may be new and maturing in details and structure

Ability to travel internationally up to 50% of the time

Independent thinker and problem-solver; comfortable working in changing operational organizational environment

Strong leadership, mentoring, organizational and communication skills

Strong ability to collaborate with internal customers, senior leadership and project managers
