

Master Data Engineer - Turkey

[Apply Now](#)

Company: ECCO

Location: İstanbul

Category: other-general

Position Summary

Are you a talented data engineer that would like to take the next step in your career? Do you love modelling and analyzing data? And do you want to be part of an ambitious and growing Master Data Management team that is transforming the Master Data Management practice in ECCO?

Then it could be you we are looking for as our new Master Data Engineer.

Come join us in our Master Data Management & Governance team and get a significant opportunity to shape and impact the future of MDM in ECCO - a key focus area of ECCO's Managing Board and top priority in our Digital Transformation.

Our team consists of 8 members, is organized in Group IT and is currently located in four locations – two in Denmark, one in Portugal and one in Poland, and we are now looking to expand our team.

Tasks & Responsibilities

Together with our team, you will be part of our global set-up of master data related to the entire value chain from development and production to sales and retail. We work with multiple different data teams to ensure the quality of our Master Data and that the maintenance of our master data follows global guidelines.

In your new position as our Master Data Engineer, you will have a critical role in the above and you will have the following main responsibilities:

Develop our MDM platform consisting of the tools Profisee, Collibra and One-Trust.

Analyze and profile our master data to support our master data stewards, master data quality

analysts, data scientists and business development projects.

Build and document our MD business glossary, MD classification and our MD lineage.

Model our master data and build rule engines for creation, validation, cleansing and anonymization so we can create the golden record.

Support our master data stewards, master data quality analysts and data scientists in the use of the MDM platform

Develop our platform methodologies and integrations between our different MDM platform tools.

Requirements

You enjoy diving into master data, and you do so with a structured and detail-oriented approach. Furthermore, you are a fast learner, team player, you like collaborating with others and your innovative and able to suggest new approaches or solutions to improve our services. As your team is located at multiple locations, you need to be able to work independently and feel comfortable using teams and similar online tools. You have a strong drive and ability to deliver within deadlines.

Many different roads lead to this position, but we imagine that you have:

A Computer Science or equivalent education.

Strong experience in data modelling.

Experience working with Profisee, Collibra or similar MDM platform tools.

Documented experience from positions as a Data engineer within a data domain.

Minimum of 3 years of experience with Azure Platform fundamentals and data resources such as Data Factory and Data Lakes, SQL scripting and Microsoft SQL Server.

Worked with data architecture and solution design.

Experience from a retail and/or production company.

Fluent English speaker

Flexible to travel

Ready to be part of MEA TEAM?

The position will be located in Turkey and support Ecco Globally.

If you want to drive innovation and help shape the industry, then seize this exciting opportunity. We will invite candidates into process on an ongoing basis, so please apply as soon as possible.
