MECHANICAL DESIGN ENGINEER(multiple positions)

We are seeking a full-time mechanical engineers with at least 3 years of design experience to join our team. This engineer's primary responsibilities will be to lead design, materials selection, and manufacturing process identification for key components of our product.

The successful candidate will:

Be comfortable making ad-hoc physics-based arguments at a whiteboard as well as quantitative proposals supported by detailed research

Have a demonstrated history of making important design decisions Carry complex projects from start to finish independently

Enjoy a mix of conceptual, computer-based, and hands-on work

Be motivated by driving new technologies from proof-of-concept to deployment

Thrive in a collaborative environment

Required:

A minimum of 3 years of mechanical engineering design experience

A B.S./B.A. in engineering/physics or a related field

A minimum of 3 years of industry experience

Demonstrated expertise in mechanical modeling/design/analysis (CAD, FEA, CFD)

Fabrication and prototyping skills

Machining experience (Mill, lathe, CNC mill, laser cutter, water jet cutter, etc.)

Ideal candidates will also have some combination of:

M.S. or Ph.D. in Mechanical/Aero engineering or related field

Experience with high-strength fiber composites

Experience with plastics manufacturing including tool design and/or mold design

Experience with product development in a start-up environment

Experience with pressure vessels

Experience with materials sourcing and vendor management
