Global company Structure

Chance to Combine Field Mechanical Knowledge With Theoretical Maintenance

Müşterimiz Hakkında

Our client is a joint venture structure, one being one of the biggest Cement Manufacturer of the world and the other being one of the biggest holding structures operating in Turkey.

İş Tanımı

Routine Maintenance: Perform regular inspections and preventive maintenance on mechanical equipment to identify and address potential issues before they become major problems. Oversee the maintenance of crushers, kilns, clinker coolers, conveyors, and other mechanical equipment used in cement manufacturing.

Troubleshooting and Repairs: Diagnose and troubleshoot mechanical failures, breakdowns, and malfunctions. Develop and implement effective repair strategies to minimize downtime and production interruptions.

Maintenance Planning: Collaborate with the maintenance planning department to develop maintenance schedules and plans. Assist in creating long-term maintenance strategies to enhance equipment reliability and longevity.

Equipment Optimization: Work on optimizing machinery and equipment to improve efficiency and reduce energy consumption. Implement modifications and upgrades to enhance the performance of mechanical systems.

Spare Parts Management: Maintain an organized inventory of spare parts and ensure availability when needed. Work with the procurement team to source and purchase spare parts in a cost-effective manner.

Documentation: Keep detailed records of maintenance activities, repairs, and equipment history. Ensure that all maintenance procedures and documentation comply with industry standards and regulations.

Safety Compliance: Ensure that all maintenance activities adhere to safety protocols and regulations. Implement safety measures to protect personnel and equipment during maintenance operations.

Training and Development: Provide training to maintenance staff on proper maintenance procedures and safety protocols. Stay updated on the latest advancements in maintenance technologies and methodologies.

Collaboration: Work closely with other departments, such as production and quality control, to coordinate maintenance activities without affecting production targets. Collaborate with the maintenance planning department to integrate maintenance plans with overall production schedules.

Budget Management: Contribute to the development of the maintenance budget. Monitor and control costs associated with maintenance activities, ensuring cost-effectiveness.

Continuous Improvement: Participate in continuous improvement initiatives to enhance the overall efficiency and reliability of the manufacturing processes. Implement best practices and lessons learned from previous maintenance activities.

Aradığımız Profil

A university degree from Mechanical Engineering Program.

Knowledge of maintenance ERP modules such as SAP PM

Spoken English level of at least B1

Data driven person and knowledge of analysis methods such as Vibration, Oil analysis and determining the possible outcomes for the equipment involved.

Willingness to relocate to Çanakkale - Turkey and stay in company provided lodging.

Teklif Edilenler

Chance to be part of a global company, make facility visits to other countries and harness technical knowledge.

Develop your mechanical maintenance knowledge with a wide range of equipment.
