

Mechanical Reliability Engineer.

[Apply Now](#)

Company: Cargill

Location: Balikesir

Category: other-general

Want to build a stronger, more sustainable future and cultivate your career? Join Cargill's global team of 160,000 employees who are committed to safe, responsible and sustainable ways to nourish the world. This position is in Cargill's food ingredients and bio-industrial business, where we anticipate trends around taste, nutrition and safety to innovate and provide solutions to manufacturers, retailers and foodservice companies.

Job Purpose and Impact

Mechanical Reliability Engineer will apply technical knowledge to deliver continuous improvement in process and asset reliability through the detection and elimination of defects. In this role, you will partner with the team to ensure the fulfillment of reliability engineering strategies.

Key Accountabilities

Implement moderately complex reliability excellence activities and identify and prioritize reliability engineering value creation opportunities.

Execute the development, design and installation of predictive maintenance programs and technology in alignment with the area procedures.

Prepare technical reviews of moderately complex projects and collaborate with related areas on new equipment reliability specifications.

Perform the identification and elimination of bad actors and the optimization of equipment availability.

Collaborate with and provide guidance to maintenance repairs and production in reliability related processes and the identification of critical spares.

Independently solve moderately complex issues with minimal supervision, while escalating more complex issues to appropriate staff.

Other duties as assigned

Qualifications

Minimum Qualifications

Bachelor's degree in a related field or equivalent experience

Minimum of two years of related work experience

Advanced level of English

Other minimum qualifications may apply

Preferred Qualifications

Solid knowledge in the application of reliability tools

Knowledge in maintenance process management

Project management experience

Experience creating complex tests and analysis

Predictive maintenance technologies experience

Our Offer

We provide a fast paced stimulating international environment, which will stretch your abilities and channel your talents. We also offer competitive salary and benefits combined with outstanding career development opportunities in one of the largest and most solid private companies in the world.
