## Operations Engineer

[Apply Now](#)

Company: ALPLA Plastik Sanayi Ve Ticaret Ltd. Sirketi

Location: Gebze

Category: other-general

### What you will enjoy doing

**We are looking for new engineers to join our Maintenance, Engineering and Process Teams!**

Operations Engineer is an entry level position at ALPLA Turkey for young professionals.

Throughout this journey, the engineers will go through a systematic, tailor-made on-site and off-site class training programs aligned with the requirements of the organization in order to prepare them professionally for their future roles. This would provide a fantastic opportunity to gain valuable practical engineering experience in a site-based environment.

Under the guidance of operations management, Operations Engineers will rotate through different engineering roles (Project/product development, maintenance, quality and production) to perform various tasks by enhancing practical, analytical, and critical-thinking skills through experience.

### What makes you great

1-3 years' experience in manufacturing environment,

Min Bachelor's Degree in electrical/electronics, chemical, mechanical and mechatronics engineering,

Excellent command / highly proficient in spoken and written Turkish & English,

Open for relocation for future opportunities,

Strong analytical skills and attention to detail (with a willingness to get into detail and understand how it fits into the broader picture),

Strong knowledge of MS Office, good Excel skills (ability to create pivot tables and use formulas to manage data),

Good communicator, dynamic, goal-oriented, highly flexible and able to take initiative,

High learning agility who is good with manufacturing systems and can use existing solutions as well as problem-solving,

Good planning and time management skills,

Familiar with packaging would be an asset.

### **What you can expect working with us**

Excellent growth potential,

Valuable hand-on experience,

Challenging opportunities,

Global Career Opportunities,

Mentoring,

Some modules of the induction program (1-2 weeks) will be held in our headquarters, Hard-Austria.

### **Advantages for Operations Engineers**

Getting to know manufacturing processes and interfaces relevant to the respective target position,

Building up a strong (international) network,

Building up an understanding for the entire organization, not only for isolated processes/steps.
