Job Title

Oracle Database Administrator

Amadeus IT Services Turkey is the market leader in Airline Loyalty & CRM solutions as well as the leading Internet Booking Engine Provider. Highly dynamic and growing company serves over 40+ airline clients all over the world.

Are you the next **Oracle Database Administrator** we are looking for? Then you need to keep reading!

Summary of the role:

You will assist the database operations team in the implementation, configuration, security, maintenance, and performance tuning/monitoring of the Amadeus database tier as assigned.

You will ensure the availability and performance of existing and future enterprise applications using Oracle database technology.

You will partner closely with cross-functional teams that include Development, Product, and Architecture to ensure delivery of our applications at the highest level of quality and performance.

In this role you'll:

Plan, document, allocate, install, and configure database servers (with appropriate patch level and within current security standards), emphasizing high availability and fault tolerance and disaster recovery, including multi-site high availability as required.

Plan, create, implement, monitor, and maintain backup solutions via automation and perform backup restore validation tasks.

Design, build, maintain database monitoring solutions for databases.

Manage databases through phases of the Software Development Lifecycle (SDLC), from development through critical Production systems. Manage and create standards, procedures, and policies for governing database environments

Provide escalation support, troubleshooting and resolution assistance, and performance tuning aid for the platform and operational database teams.

Administer and support (Level 2) large-scale 24/7 enterprise database. 24/7 is achieved by both in-office and on-call coverage on a rotational basis with other team members.

About the ideal candidate:

Basic qualifications and skills: A Bachelor's degree in Computer Science, Engineering or related fields,

Min. 4 years of managing Oracle database technologies, such as Oracle 11g/12c/19c, GoldenGate, and Exadata,

Some knowledge or experience working with MySQL, Mongo, Microsoft SQL Server (2016, 2017, 2019), or Postgres is a plus,

Prior experience working in a critical, highly available enterprise operation is a plus, Certification in one or more database platforms is preferred.

Able to troubleshoot complex database engine performance or technical issues,

Collaborate with and understand the infrastructure team dependencies on the database environment,

Ability to plan and execute tasks related to maintenance, upgrades, failover, and other database system sustaining activities as required,

Fluency in English required,

Knowledge of HW, OS, and storage technologies

Proficient with RDBMS memory architecture and associated tuning techniques

Proficiency in various scripting languages,

Excellent problem-solving skills and ability to work in abstract situations,

Understanding of capacity management concepts and techniques,

Demonstrable knowledge of DB tuning tools,

Other industry certifications such as SAFe or ITIL is a plus.

What we can offer you:

The opportunity to work for one of the world's top leading travel tech companies; a company that originated in technology innovation and sees the world with a technology-first perspective

Skills development and opportunities to try new ideas,

A global diverse work environment.

Diversity & Inclusion

We are an Equal Opportunity Employer and seek to hire the best candidate regardless of age, beliefs, disability, ethnicity, gender or sexual orientation.
