**Principle Statistical Programmer - Homebased**

**Apply Now**

Company: IQVIA

Location: Turkey

Category: other-general

**Principle Statistical programmer**

**Global Biostatistics**

**Home-based, office-based, hybrid options available**

You will provide advanced technical expertise to develop process methodology for the department to meet internal and external clients' needs, across complex projects and studies.

**Job Overview:**

This involves planning and coordinating the development of integrated programming solutions, serving the full spectrum of statistical programming needs.

You will provide internal consulting services, including specifications and user needs analysis for complex project or client requirements.

**Key Responsibilities:**

• Perform, plan co-ordinate, and implement the following for complex studies:

• The programming, testing, and documentation of statistical programs for use in creating statistical tables, figures, and listing

• The programming of analysis datasets (derived datasets) and transfer files for internal and external clients

• The programming quality control checks for the source data and to report the data issues periodically

• Ability to interpret project level requirements and develop programming specifications, as appropriate, for complex studies.

• Provide advanced technical expertise in conjunction with internal and external clients, and

independently bring project solutions to SP teams

• Fulfil project responsibilities at the level of technical team lead for single complex studies or group of studies.

• Directly communicate with internal and client statisticians and clinical team members to ensure appropriate understanding of requirements and project timelines

• Estimate programming scope of work, manage resource assignments, communicate project status and negotiate/re-negotiate project timelines for deliverables

• Use and promote the use of established standards, SOP and best practices

• Provide training and mentoring to SP team members

**Requirements:**

• Bachelor's Degree in Maths, Computer science, Statistics, or related field

• 7+ years' Statistical Programming experience within the Life Science Industry

• Advanced knowledge of statistics, programming and/or clinical drug development process

• Advanced knowledge of relevant Data Standards (such as CDISC/ADaM/SDTM)

• Advanced knowledge of computing applications such as Base SAS, SAS Graph and SAS Macros

**Join IQVIA to see where your skills can take you.**

• Global exposure

• Variety of therapeutic areas

• Collaborative and supportive team environment

• Access to cutting-edge and innovative, in-house technology

• Excellent career development and progression opportunities

• Work-Life Balance, with a strong focus on a positive well-being

**Unleash your potential!**

It takes passion to make the extraordinary possible for patients. Our culture of innovation and collaboration enables us to explore new possibilities and help improve health around the world.

IQVIA is a leading global provider of advanced analytics, technology solutions and clinical research services to the life sciences industry. We believe in pushing the boundaries of human science and data science to make the biggest impact possible – to help our customers create a healthier world. Learn more at
