Process Engineer Resin

[Apply Now](#)

Company: AkzoNobel

Location: Dilovasi

Category: other-general

We've been pioneering a world of possibilities to bring surfaces to life for well over years. As experts in making coatings, there's a good chance you're only ever a few meters away from one of our products. Our world class portfolio of brands – including Dulux, International, Sikkens and Interpon – is trusted by customers around the globe. We're active in more than countries and have set our sights on becoming the global industry leader. It's what you'd expect from the most sustainable paints company, which has been inventing the future for more than two centuries.

Qualifications

- Bachelor's degree from a reputable university in relevant departments, (preferably Chemical, Mechanical, Industry Engineering),
- Master's degree in field of polymer science and technology will be asset,
- Minimum 2 years' experience in Production and Process Engineering activities, in a multinational company, (Preferably a background in Polymer production)
- Lean Manufacturing and Operational Excellence Process knowledge,
- Systematic and analytical mind set,
- Team player, well organized, strong commitment,
- Result and solution oriented,
- Strong communication and presentation skills,
- Advanced in MS Office applications and SAP,
- The ability to work under pressure and deadlines,
- No military obligation for male candidates,

· Located in İstanbul Anatolian side or Kocaeli nearby locations.

Job Description

- Monitors the process performance through metrics such as OEE, RFT, MME, Waste Indices and takes action as required to correct adverse trends, performing plant-based process investigations
- Participate and leading the MDI-Management Daily Improvement systems meetings at the shift and daily level with identification of gaps and root cause analyses
- Monitors all related KPIs and provides necessary routine reports to higher management with improvement plans
- Develops plans to improve the above performance through focused improvement activities (in conjunction with the operations group) along with capital projects.
- Interfaces with off-site functions such as R&D/marketing and central engineering for the industrialization of new products, new raw materials and recipe changes ensuring that changes on site are controlled and managed.
- Provides expertise for on-site operations group during process related troubleshooting issues.
- For capital projects, perform initial project scoping and business case development, handing over to the project group for execution (except minor projects).
- During project execution, play a major role in commissioning and training, and then owning the technology for the site.
- Uses the appropriate change management tools to guide product and process changes (e.g., Management of Change procedures)
- Strong knowledge of how to apply in practice problem solving tools and statistical concepts (L6S – Yellow, Green belt or beyond)
- Jobholder is able to influence people at all levels on site to promote information exchange for example with operators.

All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, sexual orientation, gender identity, national origin, age, disability or veteran status.
