Reliably delivering what's needed today

There are few challenges as important today as creating solutions that support a cleaner, more energy-efficient world. This requires a commitment to constantly improve the transportation of people and things. We, at BorgWarner, made that commitment decades ago and have since been creating technologies to improve efficiency, emissions and performance in all types of vehicles.

Constantly pursuing what's next

Our proven track record has made us industry leader in clean, energy-efficient propulsion system solutions for combustion, hybrid and electric vehicles. We uncover strong trends and use smart science and technology to address a future based on varying regulations, consumer demands and automaker requirements.

Product leadership that's changing the world

Our employees have earned trusted partnerships with customers and suppliers around the world. We leverage these relationships to gain a deeper understanding of the challenges at hand and then do what it takes to develop the next solution. Our strong operations and commercialization expertise result in high volume availability of competitive, efficient products that truly drive change.

BorgWarner PowerDrive Systems is currently looking for a **Production Process Engineer**. Mission of the position is to supervise and continuously improve a specific technological process (e.g. winding, testing), in order to assure production efficiency and compliance to the requirements.

Requirements:

Controls equipments and processes for the specific technology, ensuring continuous improvement and production efficiency, in accordance with product/process specifications.

Continuously controls the reliability and the performance of the specific technology on all equipments that use it, proposing improvement programs to the responsible.

Following up problems and doing troubleshooting on production area, supervises interventions due to line stops and the correct restart of the line.

Assisting new implemented machinery and/or modification projects.

Assisting to Engineering&Maintenance Responsible to accept the machine, verifying results vs requirements, analysing machinery capability and capacity, checking the safety devices.

Forecasting the possible dangerous situations and taking action to prevent

Assure backup of all control system software

Manages the production technical data (process parameters and software).

Contributes to the improvement plans (QIP).

Develops improvement for TPM/PM plans.

Manages the training for operators and technicians for new processes/process changes.

Ensure that all operating, monitoring, maintenance and safety procedures are carried out as appropriate

Report to the Engineering&Maintenance Responsible immediately on problems that affect production and keep the Engineering & Maintenance

Responsible up to date on the status of your area.

Must have:

Knowledge of basic mechanical tools, robotics, automation, vision system, testing system and their use in manufacturing, measurement and assembly.

Understanding of current mechanical design, analysis and verification techniques, robotics, automation, testing system.

Effective verbal and written communication skills, including the use of MS Word and Excel.

Expertise with PLC Ladder base programming, HMI design and programming and St base programming, Robotic Programming.

Experience of troubleshooting, fabricating and/or repairing machines and mechanical assemblies. Knowledge of SPC.

EEO Statement

It is the policy of BorgWarner to provide equal employment opportunity to all applicants/employees regardless of age, colour, national origin, citizenship status, physical or mental disability, race, religion, creed, gender, marital status or any other characteristics covered by federal, state or local law.

Let's see how we can delivering innovative and sustainable mobility solutions for the vehicle market together.

BorgWarner Recruitment Team will connect with You. Talk to You soon.
