Company: BorgWarner

Location: Izmir

Category: other-general

Reliably delivering what's needed today

There are few challenges as important today as creating solutions that support a cleaner, more energy-efficient world. This requires a commitment to constantly improve the transportation of people and things. We, at BorgWarner, made that commitment decades ago and have since been creating technologies to improve efficiency, emissions and performance in all types of vehicles.

Constantly pursuing what's next

Our proven track record has made us industry leader in clean, energy-efficient propulsion system solutions for combustion, hybrid and electric vehicles. We uncover strong trends and use smart science and technology to address a future based on varying regulations, consumer demands and automaker requirements.

Product leadership that's changing the world

Our employees have earned trusted partnerships with customers and suppliers around the world. We leverage these relationships to gain a deeper understanding of the challenges at hand and then do what it takes to develop the next solution. Our strong operations and commercialization expertise result in high volume availability of competitive, efficient products that truly drive change.

BorgWarner PowerDrive Systems is currently looking for **PRODUCTION SHIFT ENGINEER** to perform essential activities to ensure the regular functioning of the line and to reach the best production performance by an engineering point of view.

Responsibilities:

Support Line Technician and Production Shift Supervisor to intervene promptly to restart the machine in case of breakdown to guarantee the continuity of production without losing efficiency

Support Line Technician and Production Shift Supervisor to intervene promptly to restart the machine in case of stoppages due to high PPM level to guarantee the zero-defect quality target

Guarantee the expected efficiency and quality standard by monitoring and ensuring the effectiveness of any intervention on the line

Support line opening activities on time to guarantee production efficiency and quality

Support serial change activities on time to guarantee production efficiency and quality

Ensure every tool for intervention is in perfect order and accessible.

Report the recurrent breakdowns to provide continuous improvement planning.

Report deviations to the Production EHV Production Manager promptly.

Report the trend graphs of deviations for breakdowns to maintain continuous process improvement.

Provide hands-on support with Maintenance and Engineering teams to troubleshoot and resolve extended downtime situations.

Continuously improve the manufacturing equipment to ensure that throughput targets are achieved on a regular basis.

Must have:

Advance Level Electropneumatic

Analog Control and Discrete Logic Design

Analog Electronic Knowledge

Asynchronous Motor Drivers

Camera and Image Processing

Data Analysis

Electrostatic Discharge (ESD)

PLC Programming

Robot Programming Knowledge (Epson and Kuka)

Core Tools

Traceability

Product functional knowledge

EEO Statement

It is the policy of BorgWarner to provide equal employment opportunity to all applicants/employees regardless of age, colour, national origin, citizenship status, physical or mental disability, race, religion, creed, gender, marital status or any other characteristics covered by federal, state or local law.

Let's see how we can delivering innovative and sustainable mobility solutions for the vehicle market together.

BorgWarner Recruitment Team will connect with You. Talk to You soon.
