QA Automation Engineer

Apply Now

Company: Iownit

Location: Adana

Category: other-general

At Iownit (Permanent), in Lisbon, Portugal

Salary: €31.930 - €50.000

Expires at: 2024-09-11

Remote policy: Full remote

Your impact:

As an experienced QA Automation Engineer, you will analyze, design, and deploy test automation capabilities and automated test suites. You will collaborate closely with both the QA and Development teams to assess automation requirements, suggest solutions, and develop automation tests and tools. While we are currently partially automated, we are striving towards total test automation in integration pipelines and empowering development teams to own the quality of their apps. To excel in this position, you should possess a thorough understanding of end-to-end automation and feel at ease undertaking independent project execution.

Main requirements

About you:

- 3+ years of experience as QA Automation Engineer / Test Automation Engineer with a strong emphasis on Software Quality Engineering

- Experience with API testing using Postman (ability to create tests and asserts)

Experience in creating, maintaining, and executing end-to-end automated test suites from scratch for API and Web

Demonstrated knowledge and understanding of software testing methodologies and best practices

Proficiency with UI automation frameworks such as Playwright with Typescript

Experience working with CI/CD pipelines

Experience in cloud technologies (preferably AWS)

Knowledge of debugging, profiling, and software analysis on desktop browsers and mobile devices & platforms

Experience with a variety of modern databases (Relational, NoSQL, etc.)

Experience in load testing (preferred, not mandatory)

Interested to learn a complex alternative investments software suite, consisting of multiple product lines

Strong analytical thinking skills and results driven personality

Intermediate English speaker

Last, but not least, we are here to bring value and positive experience to our clients and team. So you will join the team working on the common goal and sharing responsibility for the results!

Nice to have

Typescript
