We are looking for a Quality Assurance Automation Lead for Wingie Enuygun Group's technology team. With this position, you will have the chance to take part in the team that has developed one of the most successful internet businesses in Turkey.

### Requirements

#### What makes you special?

Leading the QA team.

Analyzing requirements and developing test plans and test strategy for existing and new projects.

Collaborating with other team members to provide guidance on creating and operating test scenarios.

Designing and developing test automation scripts when necessary.

Working on automation scripts to work on CI/CD processes.

Providing training and support to teams on testing processes.

To improve processes in the correct management of test resources.

Increasing information sharing and documentation so that the QA team has the necessary technical knowledge.

To provide directions for the correct use and operation of the XRAY tool.

To provide guidance for the correct execution of the BUG opening and follow-up process.

Reviewing automation codes and guiding the team on improvement.

To make the necessary guidance for the healthy operation of the test processes.

To follow up-to-date technologies related to test automation and to apply the appropriate ones in the processes.

Giving directions and giving feedback to the teams in order to ensure that the test environments are healthy.

### **What will you do?**

Develop automation testing strategies and plans; identify appropriate test processes according to project requirements.

Set up and continuously improve automation test frameworks, selecting suitable automation tools and technologies.

Write effective test scenarios and automation scripts, standardize testing processes.

Manage the test team, assign tasks, and conduct performance evaluations.

Conduct comprehensive tests to ensure applications and systems comply with quality standards.

Analyze and resolve issues arising during test processes, identify and manage potential risks.

Provide detailed reports on test results, ensure proper documentation, and communicate with stakeholders.

Seek and implement continuous improvement opportunities within testing processes.

Organize training sessions and provide mentorship for the testing team.

Effectively collaborate and coordinate with other departments (software development, project management, product management).
