

Senior Advanced Application Engineer

[Apply Now](#)

Company: Honeywell

Location: İstanbul

Category: other-general

Role Objective

██████████ innovating for more than 100 years and now we're creating what's next. Our programs serve a global community and our hometowns too. We provide resources and financial support to causes around the world and encourage employee volunteerism. We are committed to the highest standard in everything we do!

We have an opportunity for a Senior Advanced Application Engineer to join us at Honeywell Turkey, İstanbul. In this role, you will take responsibility, alongside the PM and project consultant, for all aspects of successful process optimization delivery including client contact, project engineering, scheduling and a hybrid role, 3 + 2 days model.

Key Requirements:

██████████
Lead the APC/PO project activities, ensuring buy-in and acceptance from the customer including, but not limited to – Project Kick Off, Pre-Test & Tuning, Step Testing, Inferential development, Model Acceptance Testing, Commissioning & SAT.

Conduct training to plant operations & customer engineering teams on Honeywell suite of process performance solutions.

Identify/troubleshoot process unit operations, software, and instrument problems.

Create and implement new strategies to improve process efficiency, process control utilization & reliability.

Shares technical knowledge with project team, supervisor, own discipline and other disciplines.

Communicate with internal team regarding technical issues, escalating these early in the project.

Promote adjacent process performance solutions including but not limited to process simulation & design, operator training / simulations, blending & movement automation.

Key skills and qualifications

Minimum of 3 years demonstrated experience in delivery of process optimization solutions

Hands on application experience implementing Real-Time / Multi-Variable Optimization solutions in process industries including but not limited to Refining and Petrochemical.

Experience developing inferential / property predictors.

Programming languages (Visual Basic, CL, Fortran)

Data Historians (Uniformance PHD, OSI PI, IP21) & DCS/Operator Stations

Strong knowledge of automation network architecture, integration strategies, HMI design.

Experience with PID/APC monitoring applications. Expert experience with PID Tuning and implementation of Advanced Regulatory Control

We Value:

Good verbal, written communication & presentation skills.

Strong team player able to work effectively with customers, multidisciplinary project teams and other departments within the company.

Strong analytical, troubleshooting & and problem solving skills, quality oriented, logical & thorough.

Quick learner, think efficiently, and inquire effectively in order to gather and understand user requirements.

An ability to work independently

Effective, clear communication in English

Our offer

A culture that fosters inclusion, diversity, and innovation in an international work environment

Market specific training and ongoing personal development.

Experienced leaders to support your professional development

Equal opportunity statement

Employer and value diversity at our company. We do not discriminate based on race, religion, color, national origin, gender, sexual orientation, age, marital status, veteran status, or disability status. We will ensure that individuals with disabilities are provided reasonable accommodation to participate in the job application or interview process, to perform crucial job functions, and to receive other benefits and privileges of employment. Please contact us to request accommodation.

Join us now and be part of a global team of thinkers, innovators, dreamers, and doers who make the things that make the future!
