Company: Renesas Electronics

Location: İstanbul

Category: other-general

Job Description

Support silicon evaluation requirements to meet evaluation timescales as set by product schedule. Responsibility for product support with internal and external customers and delivery of product evaluation.

Perform physical silicon device evaluation at chip and board level and document errata to support necessary device modifications.

Take on product lead role. This includes planning evaluation, supporting collateral development, reporting to management and customers, and reviewing evaluation documents.

Support the development of software for automated measurements.

Independently develop ideas to improve the silicon evaluation flow.

Interface directly with customers during their design-in and ramp phases to resolve application and device-related issues.

Drive interactions with Design Engineering, Test Engineering, Product Engineering and Quality Engineering to resolve product issues.

Mentor Junior Applications Engineers and assist with the hiring and interview process.

And all other tasks that seem reasonable by your Manager.

Qualifications

Typically 5 – 8 years experience

Strong competence with various tools and procedures, reaching specialist level

Ability to work with minimal instruction – either independently or collaboratively

Ability to make good judgement in selecting method/technique for obtaining solutions

Able to confidently share own expertise and work to others

Able to make significant contribution to projects, programs and business initiatives with creativity and ingenuity

Ability to support and mentor junior team members

Cross cultural awareness and sensitivity

Results-oriented and able to deliver on-time under a tight schedule

Ability to work both independently and part of a team

Flexible to undertake occasional international travel at short notice

Excellent command of verbal and written English

Ability to propose innovative solutions

Concise and precise communication and customer skills within multi-site and multi-cultural environment
