About Us

Volt Lines is a technology-powered mobility platform aiming to solve urban mobility problems. We view empty seats in traffic as both the cause of the problem and its solution. There are more than 50,000 buses in Istanbul operating at 9% efficiency and we want to solve this problem. Making shuttle buses smarter, more efficient, and dynamic, we create an alternative transportation network that can replace even car ownership. Companies and other institutions can benefit from the Volt Lines transportation network for the daily commute needs of their staff.
