Senior Cyber Security Architect

Apply Now

Company: Gorillas

Location: İstanbul

Category: other-general

Hi there

Getir is the pioneer of ultra-fast delivery. By bringing together great technology with a unique operational model, we were the first to introduce the concept of groceries being delivered to your door in minutes. Technology continues to be at the heart of our business as we expand across the globe.

Great technology is developed by great people, and thats why were looking for talented technologists to join our team.

What Youll Be Doing

Defines cybersecurity requirements to integrate cybersecurity standards into product design, including Secure Coding Guidelines, OWASP, SCA and DCA processes, SW component evaluation process, Secure Service and Support Model, Post-Market Cybersecurity Management Programs; evaluates and recommends the tools and technologies used; acts as process owner when appropriate.

Work in collaboration with architects and engineers to represent DevOps during the design and development of software or extensive revisions to existing applications.

Keep finding areas of improvement in the current infrastructure to be more resilient and reliable.

Developing tools that empower the engineering team to validate code before deploying quickly and confidently.

Infrastructure as a Service (AWS, Azure, Google Cloud Platform)

Familiarity with containers and related inspection capabilities

Collaborate across teams to consolidate and simplify DevOps tools and services, then support other infrastructure engineers using them in production.

Integration of cyber-security considerations into product design, implementation, review, update.

Monitor product cyber-security threats and vulnerabilities, perform planned and on-demand Cybersecurity Risk Assessment; work with engineering teams to design and prioritize mitigating solutions.

Define the standard security settings in products and solutions based on hardening standards.

Provide hands-on technical support expertise in general SW design and development, system engineering, IT and networking as necessary.

Maintain complete confidentiality of company and customer intelligence acquired at job.

What Youll Bring

Excellent communication and teamwork skills, with fluent written and spoken English.

Bachelors degree in software engineering, computer science or related discipline, or equivalent experience.

Experience with Java or C# /.NET or C++, and Python.

Scripting abilities with Unix command line (curl, grep, awk, sed, chmod, ssh, etc)

Experience with web programming and technologies.

Experience with CI/CD system components such as Gitlab, Github, Jenkins, Concourse, Bamboo, Circle.

Prefer candidates with a deep knowledge of software security and architectures.

You as a Getirian

You are a good person first, everything else is secondary. You are a champion of growth, and actively strive to be the best version of you, for yourself and your team. You value diversity, and embrace ideas over hierarchy. You aren't afraid to learn and re-learn at Getir speed. You are an initiator, in charge of your own story and your legacy.

Benefits

Once-in-a-career opportunity to make an impact in one of the fastest-growing mobile-commerce businesses in the world.

Take charge of your own career growth with us through professional development opportunities! We really mean it when we say that upward and sideways mobility are some of our favorite terms.

Working in a diverse and dynamic environment with our international team of thousands of Getirians across the globe.

Health insurance (family included)

Meal card

Competitive salary

We are a diversity and equal opportunity employer.
