Company: Fintech Company

Location: İstanbul

Category: other-general

At Fintech Company (Permanent), in Portugal

Salary: €50.000 - €80.000

Expires at: 2027-06-18

Remote policy: Full remote

We are cutting-edge fintech company that revolutionizes financial management. Our innovative platform combines advanced technology with personalized financial insights, empowering individuals and businesses to make informed decisions, optimize investments, and achieve their financial goals. With secure data analytics and seamless user experiences, we bring simplicity and efficiency to the world of finance, empowering you to navigate the complexities of the financial landscape with confidence.

As a Senior DevOps Engineer, you will play a critical role in ensuring the seamless deployment, management, and optimization of our cloud infrastructure. You will collaborate with cross-functional teams to design, implement, and maintain robust and scalable cloud-based systems that meet our clients' needs. You will play a critical role optimizing our DevOps practices, ensuring the seamless delivery of cutting-edge financial platforms.

Responsibilities:

Design, implement, and maintain cloud infrastructure and tools to support our applications and services.

Collaborate with development and operations teams to ensure efficient and reliable deployment, monitoring, and scaling of systems.

Implement and maintain CI/CD pipelines to automate the software delivery process.

Utilize infrastructure as code principles and configuration management tools to maintain consistent and reliable environments.

Optimize system performance, scalability, and security by closely monitoring and troubleshooting production environments.

Optimize cloud infrastructure to ensure high availability, security, and cost efficiency.

Collaborate with clients to understand their requirements and provide technical guidance and support throughout the project lifecycle.

Stay up-to-date with the latest trends and best practices in cloud computing, DevOps, and infrastructure automation.

Main requirements

Minimum of 5 years of experience as a DevOps Engineer

Strong expertise in cloud platforms such as Amazon Web Services (AWS), Microsoft Azure, or Google Cloud Platform (GCP).

Proficiency in scripting languages such as Python, Shell, or PowerShell for automation and customization.

Proficiency in infrastructure-as-code tools such as Terraform or CloudFormation.

Extensive experience with containerization technologies like Docker and container orchestration platforms like Kubernetes.

Deep understanding of CI/CD methodologies and experience with related tools such as Jenkins or GitLab CI.

Knowledge of infrastructure security best practices and experience in implementing secure DevOps pipelines.

Benefits & Perks

Highly competitive salary and comprehensive benefits package.

Flexible working hours

Collaborative and inclusive work environment that values creativity and innovation.

Opportunities for professional growth and career advancement within a rapidly expanding organization.

Access to cutting-edge technologies and tools to support your data science initiatives.

Work-life balance and a supportive culture that values your personal well-being.
