

Turkey Jobs Expertini®

Senior Full-stack Engineer

[Apply Now](#)

Company: Arkadium

Location: Turkey

Category: other-general

At Arkadium (Permanent)

Expires at: 2024-07-21

Remote policy: Global remote

At Arkadium our purpose is to have fun while creating fun - and that's exactly what we've been doing for 20 years. We're the creators behind the world's most-played games. From the Solitaire that came on your Windows machine, to hundreds of other games you've come to know and love - you can find our games on Arkadium.com, iOS, Android, and lots of other big sites worldwide.

As a proud Evergreen business our values of Fierce Drive, Positive Energy and Living Full Lives are the driving force behind how we run and the choices we make.

We're privately held (aka stable and reasonable about growth), founder-led (aka passionate about our craft) and we consistently rank as a "Best Place to Work" (aka not your typical games company).

Interested in becoming an Arkadian? We'd love to hear from you!

Overview

Arkadium is seeking an exceptional and experienced software engineer to help support the development of our award-winning games.

While this role is remote, candidates must be available to work standard hours from 09:00 to 18:00 in the Western European Time (WET) zone - (Portugal time zone), where most of the Engineering and Product teams are based.

For candidates not residing in Portugal, you will be onboarded as a contractor through our international payroll provider.

Responsibilities

Lead end-to-end development of scalable and high-performance full-stack applications

Architect and design comprehensive and robust full-stack solutions, ensuring alignment with business objectives and technical requirements

Design, develop, and maintain server-side applications and APIs

Design and optimize database schemas, ensuring data consistency, integrity, and security

Optimize application performance by identifying and addressing bottlenecks in both front-end and back-end components

Implement and enforce security best practices for data protection and user authentication

Lead code reviews and mentor other engineers to ensure high code quality and adherence to best practices

Create and maintain comprehensive documentation and technical specifications, ensuring ease of understanding and knowledge transfer

Stay up to date with the latest trends and developments in web development and share knowledge with the team

Participate in agile development processes and contribute to team goals and objectives

Main requirements

Bachelor's degree in Computer Science, Engineering, or a related field

5+ year experience as a full-stack engineer, with a focus on designing and building scalable systems

Strong proficiency in modern front-end frameworks (React, Svelte, or Vue.js) and server-side programming languages (Node.js)

Experience with relational and/or NoSQL databases (MySQL, PostgreSQL)

Proficiency in designing and implementing RESTful APIs

Solid understanding of microservices architecture and distributed systems

Familiarity with cloud platforms (Azure)

Experience working with a back-end-as-a-service such as Nakama or Playfab

Experience with containerization and orchestration tools (Docker, Kubernetes)

Experience working in an agile development environment

Demonstrated ability to lead and mentor other engineers

Ability to work independently and take ownership of projects from start to finish

Strong problem-solving and critical-thinking skills

Strong verbal and written communication skills

Benefits & Perks

Competitive compensation with structured performance and career development check-ins

A unique culture of transparency, true teamwork and fun

Paid time off is categorized as 40 flex days for the year

Profit Sharing Plan/Bonus and Additional budget for courses and conferences you are

interested in
