

# Turkey Jobs Expertini®

## Senior Java Developer

[Apply Now](#)

Company: IT Company

Location: Kayseri

Category: other-general

At IT Company (Contractor)

Expires at: 2024-06-25

Remote policy: Global remote

*We're a Digital Company and our passion lies in crafting cloud-based applications and scalable, high-performing micro-services that frequently integrate with APIs.*

### **Responsibilities:**

- Participating in the architecture, design, development, and implementation of complex applications and core utilities
- Collaborating with divisional architects, lead engineers, and other senior engineers to establish architectural standards for the division
- Ensuring applications are designed with security and compliance considerations from inception, by governing policies
- Providing mentorship to team members, including outsourced resources
- Developing business domain expertise and offering technical support to Subject Matter Experts (SMEs) in that domain
- Proactively ensuring the consistency, documentation, and flexibility of APIs at both the system and sub-system levels
- Advocating for and championing best practices across various areas of software engineering, including security, testability, reliability, and scalability

- Assisting QA in developing quality and performance monitoring programs for specific systems, sub-systems, and components, with coverage of automated tests
- Writing high-quality and readable code
- Developing and deploying new features and bug fixes promptly
- Writing tests (unit tests, integration tests, and end-to-end tests)
- Integrating APIs and conducting code reviews
- Attending meetings related to sprints consistently
- Demonstrating patience and perseverance in overcoming challenges, problem-solving, and learning new computer languages and techniques

### **Main requirements**

- Knowledge of **Italian** language at least at a conversational level (C2 level - should be able to read, write, and speak) is mandatory
- Minimum 4 years of experience with **Java** and the **Spring** Framework
- Senior-level knowledge and experience **RESTful API** and **microservices**
- Experience with **CI/CD** tools like **MS DevOps** and **AWS CodePipeline**
- Working knowledge of Service-Oriented Architecture (**SOA**)
- Exposure to the Publish-Subscribe model **event streaming platforms** (e.g., Pulsar, Kafka, Flink, or AWS Kinesis)
- Ability to communicate and collaborate with globally distributed teams (internal and offshore)
- Designing, developing, implementing, and maintaining Java application phases, code, and software
- Conducting software analysis, programming, testing, debugging, and recommending changes to improve established processes
- Translating requirements into specifications and identifying production and non-production application issues
- Knowledge and use of **Agile** Methodologies and the Scrum framework
- Competence and comfort using multiple frameworks (Spring, Data, Security, JPA/Hibernate, JUnit, Mockito)
- Knowledge and use of Design Patterns MVC, Open API, and Microservices
- Strong attention to detail with the ability to identify errors and make adjustments in a testing environment.

### **Nice to have**

**Docker** experience

**AWS** proficiency

**Frontend** skills in Angular, React, or similar

- Experience with **message queues** such as Kafka or similar
- Strong knowledge of **linux** (or UNIX-like OS)
- Familiarity with the Test-Driven Development (TDD) approach
- Understanding of the Mobile-first approach
