## Senior Java Software Engineer

[Apply Now](#)

Company: Huawei Telekomünikasyon Dış Ticaret Ltd

Location: Ankara

Category: other-general

Would you like to take part of our dynamic team? If you are a Senior Level Engineer (Java Backend) and passionate about the product development experience, then we would like to meet you to make workplaces a better engaged ones together to make a difference. Developer will be responsible for developing, modifying, and testing the code to support the development of a seamless user experience using Java.

As a member of the engineering team, developer will ensure code is prepared for collaboration with back-end data and service-layer teams.

Developer will support the review of existing code while working closely with a diverse team.

There will be a focus on ensuring accessibility for all users by developing a front end that functions across browsers, platforms, and devices while meeting accessibility and security requirements.

This is a hands-on development role that will offer exposure to the full development cycle whilst working closely with the business team.
