Company: Huawei Telekomünikasyon Dış Ticaret Ltd

Location: İstanbul

Category: other-general

Job Description:

Huawei Enterprise Team is looking for Senior Network Engineer who will do and perform network project technical design & plan, hardware supervision, commissioning, acceptance tests, etc...

Implementation of Huawei switch, router, security, network management & analysis software and Wireless (WLAN) products including enterprise level campus and data center switches, core & service & access routers, firewall & VPN gateways, IPS & IDS, AntiDDoS gateways, WLAN tools, access controllers (ACs) and access points (APs), etc.

Providing technical remote support for network projects and bringing technical solutions to customers. Building, provisioning, maintaining and troubleshooting enterprise level network infrastructure systems, diagnosing problems, making reasonable report to customers and project team.

Providing project/solution implementation, in coordination with partners and/or cross-functional team members to have the network implemented on time. Providing technical support, handling problem analysis and providing other required service to company's agents and other valued service partners.

Providing support and guidance to company's service partners which relate to technical enquiry, issue analysis, technical solution and document.

Assisting and auditing network design and solution for company's partners and customers.

Recognizing problems need to be escalated to HQ and keep track of the whole process flow.

Resolving single and cross technology incidents independently, and working with team members to resolve unusually complex or cross technology incidents. Having ability to plan and execute product demonstrations and proof of concept tests in the pre-sales cycle in close cooperation with the product sales team.

Position Requirements:

Being familiar with routing and switching technologies and principles.

Having experience in planning and designing large-scale campus networks.

Having experience in WLAN network planning and design.

Being familiar with the RADIUS authentication and authorization schemes of at least one vendor.

Having HCIP, professional level network or above level network certification of any vendor.

Good communication skill of English reading, writing and speaking.

Having knowledge of carrier networks MPLS and SDWAN technologies is preferred
