

## Senior Software Engineer - AI Training - Remote

[Apply Now](#)

Company: Remotebase

Location: Ankara

Category: other-general

Start your interview for this role here We have partnered with an organization to train large AI language models, helping cutting-edge generative AI models write better code. Projects typically include discrete, highly variable problems that involve engaging with these models as they learn to code. Example projects include: \* Evaluating the quality of AI-generated code, including human-readable summaries of your rationale. \* Solving coding problems and writing functional and efficient code. \* Writing robust test cases to confirm that code works efficiently and effectively. No previous experience with AI is necessary. Requirements: \* Complete fluency in the English language is required. You should be able to describe code and abstract information clearly. \* Proficiency in working with any of the following: Python, Java, JavaScript / TypeScript, SQL, C/C++/C#, and HTML. \* 3+ years of work experience required. \* Proven interest in AI. Qualifications: \* Bachelor's degree in Computer Science or equivalent. \* Proficiency working with any of the following (in addition to the languages above): Swift, Ruby, Rust, Go, NET, Matlab, PHP, HTML, DART, R, Apex, and Shell. \* Recognized accomplishments or contributions to the coding community or in projects. \* Proven analytical skills with an ability to approach problems creatively. \* Adept communication skills, especially when understanding and discussing project requirements. \* A commitment to continuous learning and staying updated with the latest coding advancements and best practices. \* Enthusiasm for teaching AI models and experience with technical writing.
