Location: Ankara

Category: other-general

Job Description

Start your interview for this role

We have partnered with an organization to train large AI language models, helping cutting-edge generative AI models write better code. Projects typically include discrete, highly variable problems that involve engaging with these models as they learn to code. Example projects include: * Evaluating the quality of AI-generated code, including human-readable summaries of your rationale. * Solving coding problems and writing functional and efficient code. * Writing robust test cases to confirm that code works efficiently and effectively. No previous experience with AI is necessary. Requirements: * Complete fluency in the English language is required. You should be able to describe code and abstract information clearly. * Proficiency in working with any of the following: Python, Java, JavaScript / TypeScript, SQL, C/C++/C#, and HTML. * 3+ years of work experience required. * Proven interest in AI. Qualifications: * Bachelor's degree in Computer Science or equivalent. * Proficiency working with any of the following (in addition to the languages above): Swift, Ruby, Rust, Go, NET, Matlab, PHP, HTML, DART, R, Apex, and Shell. * Recognized accomplishments or contributions to the coding community or in projects. * Proven analytical skills with an ability to approach problems creatively. * Adept communication skills, especially when understanding and discussing project requirements. * A commitment to continuous learning and staying updated with the latest coding advancements and best practices. * Enthusiasm for teaching AI models and experience with technical writing.
