

Senior Technical Application Engineer, Water Treatment

[Apply Now](#)

Company: Michael Page

Location: İstanbul

Category: other-general

Develop and analysis methods for laboratory procedures.

Perform simple analyses when necessary on samples taken from the field or from the customer.

Identify bottlenecks and inefficiencies in laboratory work-flows.

Involves in the formulation and preparation of chemical solutions for water treatment processes for oil & gas wells.

Actively participate in cross-functional meetings and project discussions.

Collaborate with supervisors to design and execute experiments for water related treatments.

Document and analyse experimental data, preparing comprehensive reports for review.

Contribute to the development of standard operating procedures (SOP's) for water treatment processes.

After managing sales activities and providing the necessary technical support, prepare the relevant technical reports.

Create a sustainable sales environment by ensuring customer satisfaction.

Provide technical support to its existing customers in the field; and also conduct field

inspections for potential customers and provide the necessary technical information.

Array

Bachelor's/ Master's degree in Chemistry, Chemical Engineering, Environmental Engineering, Biology or a related field.

Water treatment or speciality chemical industry experience.

Working knowledge of boilers, cooling towers, and waste-water treatment systems or paper machine operations, wet end chemistry, and pulp mill operations.

Laboratory experience, preferably in water treatment for at least 4 Years.

Familiarity with laboratory techniques and equipment.

Knowledge of water treatment chemistry, with a focus on scale and corrosion, flocculation and coagulation is a big plus.

Ability to design the new products, systems and compositions with strong research skills.

A thorough knowledge of API procedures and testing methods and /or ASTM, BS procedures, QA/QC of chemicals.

Compliance with HSE and following the required regulations.

Strong research, analytic and communications skills.

Founded in 2017. The laboratory and head office of the company located in Istanbul and their production is located in Antalya.

Manufactures, provides and applies oilfield chemicals and systems for complex sub-surface conditions.

Be part of a fast growing organisation that entered Turkey top 500 exporters list in a matter of 5 years.
