Valeo Thermal Commercial Vehicles is looking for **Site SQA Engineer** to be based in **İstanbul** / **Esenyurt Plant**

You will be responsible for ensuring that the products and services supplied meet customer and regulatory requirements and for communicating customer requirements and expectations throughout the organization and developing systems to meet them.

What you will win:

Mission:

> You will identify and manage the component non conformity issues in the site and actions needed to protect the Valeo assembly lines.

> You are responsible for conformity check of the components supplied to and into the production site including Incoming inspection reporting.

> You are in charge of the supplier PDCA analysis and 8D reports and relevancy until the PDCA closure with a perfect communication to the APU. Site SQA is the link

between Supplier Quality Engineer (SQA), Supplier representative and the Valeo production teams.

You are fully responsible for tracking and improving supplier performance.

Ensure % conformity of components supplied on a site level:

You contact the supplier as soon as an issue is detected with a purchased component to get the supplier to organize the containment in 24h. Apply the QRQC/SRM/PG rules to open incidents.

You confirm the robustness of the containment by looking for recurrence after containment has been set

You will ensure % yearly conformity of the purchased components in accordance with stage 7 of the Product Quality Assurance (PQA) approval process

You will provide yearly initial samples approval with capability evidence

You will manage the PQA status

You will be the pioneer for the process quality improvement by giving correct feedback and finding the potential improvement points.

You participate in production and quality meetings to follow up process quality and make improvement projects.

Initiate, analyze, report and follow-up on incidents until the PDCA closure:

You will initiate the quality incidents to the supplier in accordance with the Supplier Quality Manual (SQM) after preliminary investigation at the Valeo site has been performed with Valeo site quality

You will track each incident detected at the site and ensure Quick Response reactivity and full PDCA analysis is met in accordance with Group Standard: 24hrs / 5 days / 10 days rule

You will pull daily the information from the supplier and / or PG SQA Manager and communicate during the APU and Supplier QRQC

You will escalate to PG SQA or Purchasing Manager for any PG SQA or Purchasing Commodity Engineer support required or for any roadblock regarding the incident problem solving activity or the yearly component conformity

You will participate in the Supplier and APU QRQC and in Plant QRQC when required

Manage, consolidate and update the following key indicators on a site level:

You will report outstanding supplier issues.

You will react to find a quick response from the suppliers (and monitor PDCA reactivity)

You will track the supplier chargebacks due to quality issues.

You will request yearly conformity review for all the purchased components to the suppliers.

What you should have:

You have a bachelor's Degree **Engineering**

You have a minimum of **8 years experience** in **Automotive OEM** or as **Supplier management**

You have Q **uality and / or Supplier Quality Engineering** experience

You have a good knowledge on quality tools such **problem solving techniques, 8D, FMEA, CPs, 5 Whys Analysis and PPAP processes.**

Our environment is strongly international oriented, so you have a good level **English**

You are willing to **travel domestically and abroad**

You have **good communication skills,** have an **international mindset** and are **open-minded** to new cultures and new ways of working and thinking

In addition

Experience in **SAP** is a plus.

ISO, IATF or **relevant Audit experience** is an asset.
